this volume is based on the program of the second international conference on drugs of abuse immunity and aids held in clearwater beach fl in june 1992 the conference was supported in part by the university of south florida college of medicine with financial assistance from the national institute on drug abuse the focus of this conference was the effects of drugs of abuse on immunity it is now widely recognized that psychoactive drugs of abuse including marijuana cocaine and opiates as well as alcohol have marked effects in an individual including effects on their nervous system and behavior in the past two

decades the scope of studies concerning the effects of some drugs of abuse have also involved investigations of alterations of various physiologic parameters including effects on the immune system and the influence of such immune alterations on normal physiological responses in this regard participants in this second international conference provided newer information concerning both basic and clinical aspects of drugs of abuse and immunity especially immunodeficiencies in this regard advances have been made in recent years concerning the nature and mechanisms whereby the immune system is regulated and the possible mechanisms by which drugs of abuse influence such immune systems in particular the emergence of psychoneuroimmunology as a new discipline the last decade has heightened interest in the immune responses influenced by psychoactive drugs this has resulted in interdisciplinary investigations involving both clinical and basic scientists including microbiologists immunologists physiologists psychiatrists oncologists psychologists etc

this volume is based on the proceedings of the international conference on microbial infections role of biological response modifiers held in tampa fl may 29 31 1991 the major purpose of this conference was to bring together in one forum prominent investigators from around the world studying a variety of microbial pathogens including bacteria viruses and fungi and the effects of biological response modifiers brm on the immune response to these microorganisms brm have been widely utilized in the area of antitumor resistance and include not only experimental tumor cell vaccines but also biologically active substances such as cytokines i e interferons tumor necrosis factor and interleukins as well as products from bacteria which influence host resistance mechanisms it is the belief of the organizers of this conference that it was very timely to discuss in detail brms as they impact on microbial infections per se it is now widely accepted that immunocompromised individuals including those exposed to immunosuppressive substances such as antimetabolites used for chemotherapy of malignancies or infectious agents such as the human immunodeficiency virus and other viruses which depress the immune response and in turn affect a host so as to become highly susceptible to opportunistic microorganisms benefit from brm stimulation of their immune system a wide variety of immunomodulators are now being studied in terms of treating infectious diseases as well as malignancy and autoimmune diseases
