the contributing authors to this book all pre eminent scholars in their fields present their current thinking about the processes that underlie creativity and aesthetic experience they discuss established theory and research and provide creative speculation on future problems for inquiry and new approaches to conceptualising and investigating these phenomena the book contains many new findings and ideas never before published or new by virtue of the novel context in which they are incorporated thus the chapters present both new approaches to old problem and new ideas and approaches not yet explored by leading scholars in these fields the first part of the book is devoted to understanding the nature of the perceptual cognitive and aesthetic processes that occur during encounters with visual art stimuli in everyday settings in museums and while watching films also discussed in part i is how cultural and anthropological approaches to the study of aesthetic responses to art contribute to our understanding about the development of a culture s artistic canon and to cross cultural aesthetic universals part ii presents new dimensions in the study of creativity two approaches to the development of a comprehensive theory of creativity are presented sternberg s investment theory of creativity and a systems perspective of creativity based on a metaindividual world model also covered are the factors that contribute to cinematic creativity and a film s cinematic success and the complex nature of the creative processes and research approaches involved in the innovative product design necessitated by the introduction of electronics in consumer products part iii deals with the application of concepts and models from cognitive psychology to the study of music literary meaning and the visual arts the contributors outline a model of the cognitive processes involved in real time listening to music investigate what readers are doing when they read a literary text describe what research shows about the transfer of learning from the arts to non arts cognition and discuss the kinds of thinking skills that emerge from the study of the visual arts by high

school students in part iv the authors focus on the interactive contribution of observers personalities and affect states to the creation and perception of art the chapters include a discussion of the internal mechanisms by which personality expresses itself during the making of and the response to art the relationship between emotion and cognition in aesthetics in terms of the interaction of top down and bottom up processes across the time course of an aesthetic episode the affective processes that take place during pretend play and their impact on the development of creativity in children and the causes and consequences of listener s intense experiences while listening to music

it is claimed in this book that expectations should not necessarily be treated as unobservable variables and that there is much to be learned from survey data a unique data set is examined the output of surveys conducted twice a year since 1952 among informed italian businessmen and economic experts the predictive accuracy rationality and determinants of inflation expectations are investigated following an extensive analysis of measurement issues the estimate of inflation expectations are evaluated for both wholesale and consumer price changes comparing them with those held by respondents to other surveys for different countries and with the forecasts generated by alternative predictors of the inflation process the expectations considered in the study are shown to be remarkably accurate anticipating all major price changes even if during the years of high and rising inflation which have followed the first oil crisis they appear to underestimate on a number of occasions the inflation rates actually experienced as the alternative predictors also do an accurate testing of the rational expectations hypothesis is conducted rejecting it over the entire sample period but not for the period of mild but variable inflation which preceded the first oil crises it is shown that a mixed adaptive regressive model with both error learning and return to normality components adapts very well to the data considered in this study and that inflation expectations are also influenced by an uncertainty component which affects the adaptive coefficient furthermore regression towards normality is slowed down when industrial capacity is utilized above normal and vice versa many other issues such as the dispersion of individual answers the problems of aggregation and measurement error are also considered and an extensive bibliography of other works where use is made of direct information on expectations is included

vol for 1958 includes also the minutes of the final general assembly of the united presbyterian church of north america and the minutes

of the final general assembly of the presbyterian church in the u s a both titles in old catalog
