harry judge it is doubly fortunate that a foreword is not an introduction since it is mercifully brief it should not be expected to mention respectfully each of the distinguished contributions which constitute the word before which it modestly stands as herald for the same reason it cannot be expected to constrain within one overarching framework contributions which are essentially varied in subject matter and method the brief of a foreword writer might indeed be compared to that of a musician commissioned to write an overture to an opera which he had not written to write such a piece for a volume devoted to eric hoyle is nevertheless a privilege as well as a pleasure partly of course because this volume celebrates a long and distinguished career devoted to the application of intelligence and less assertively theory to the improvement of practice and partly because this abbreviated overture is privileged by being placed before a set of virtuoso performances throughout which consistent and coherent themes do insistently resonate those themes are the very same that distinguish eric hoyle's own work

like other big city school systems chicago's has been repeatedly reformed over the last century yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students many blame the educational establishment for resisting change other critics argue that reform occurs too often still others claim it comes not often enough dorothy shipp's reappraises the tumultuous history of educational progress in chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform

models were either resisted or crowded out shipps chronicles how chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others to show why city schools have failed urban children so badly she traces chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s she also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates business people may be too wedded to a stunted view of educators to forge a productive partnership for change unionized teachers bridle at the second class status accorded them by managers if reform is to reach deeply into classrooms shipps concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests this study clearly shows that in chicago as elsewhere urban schooling is intertwined with politics and power by reviewing more than a century of corporate efforts to make education work shipps makes a strong case that it s high time to look elsewhere perhaps to educators themselves for new leadership
