description do you know what problem solving skills are do you want to know how to use problem solving skills many people believe that your feelings are separate or independent of your thoughts but the truth is that feelings are as a result of your thoughts this revelation is very enlightening as well as liberating it is enlightening because you realize that we are responsible for our attitudes because the power to decide our perspective our thoughts and our mood is in our hands when you are aware that you can choose and decide your thinking you discover that you have the ability to best control the circumstances in your life enhance your decision making abilities and live a life that is more productive we think critically with a mindset of problem solving when we depend on reason and not emotions analyze a wide range of viewpoints and perspectives have an open mind to other interpretations acknowledge new evidence explanations and results are always willing to re evaluate information can separate from personal biases and prejudices be considerate of all possibilities avoid forming quick conclusions just like all other skills developing knowledge in critical thinking or problem solving takes time practice and perseverance step by step critical thinking for problem solving identify the problem first identify if there exists a problem to be solved it is possible that after thinking this through you realize there is no problem but a misunderstanding if then there is a problem you need to identify the exact problem try and analyze the pros and cons of the problem define and state it analyze the problem after identifying the problem now analyze it using different perspectives and ask questions like is it possible to solve it do you need help to solve it the advantage of looking at a problem in different angles is that you may be able to come up with a solution immediately you may also be able to identify a narrow point of view or bias that needs to be expanded brainstorm brainstorming is important as it enables you to

come up with several possible solutions when you come up with several possible solutions makes it easier for you to find the ultimate solution decide on the best solution go through your list of proposed solutions take your time and determine what solution amongst the ones you have best suits the situation take action now it is time to implement your solution every problem has a solution do practice approaching problems as opportunities and not as obstacles this will help you enhance your problem solving and critical thinking skills for every problem that you are able to solve it increases your self worth and confidence critical thinking enables you to handle future problems with more skill and increases your experience as you gain perspective in this book we will discuss the following topics what is critical thinking the psychology of critical thinking four goals for critical thinking self direction self discipline self monitoring self correction and many more do we have your attention now are you excited look no more download our book now and know everything about problem solving skills

why is it that some people find it easy to solve tough problems with simple solutions while others find this feat nearly impossible you ve no doubt looked at solutions to problems and said i should have thought of that but you didn t the answer is not just creativity although that certainly helps rather the power to find these creative solutions lies in our ability to search for and find facts that relate to the situation and put them together in ways that work as an individual facts and knowledge can only go so far by tapping into the knowledge of others staff colleagues family or friends anyone can expand the range of solutions available this is a very quick read and can be done over breakfast lunch or a coffee break so enjoy feeding your mind what is a problem a problem is a gap between ideal and actual conditions a decision is a choice between alternative solutions to a problem problems can be classified in three ways problems that have already happened problems that lie ahead problems you want to prevent from happening there are three ways to approach problems you can stall or delay until a decision is no longer necessary or until it has become an even greater problem you can make a snap decision off the top of your head with little or no thinking or logic you can use a professional approach and solve problems based on sound decision making

practices
