the sense of beauty a first approximation it is generally acknowledged that during the first half of the eighteenth century a profound change was wrought in the theory of art and natural beauty to this period we owe the establishment of the modern system of the arts 1 in england the notion of a separate and autonomous discipline devoted solely to art and to beauty came into being through the concept of aesthetic disinterestedness 2 in addition emphasis in the theory of art shifted from object to subject from the work of art to the perceiver and critic focal point for this change was the sense of beauty which in concert with the moral sense of the british school represented a dominant force in enlightenment value theory it is francis hutcheson who more than anyone else can be thought of as the founder and principal spokesman of this philosophical coterie if the aesthetic sense was instrumental in the transfer of interest in the philosophy of art from object to perceiver the aesthetic and moral senses together were no less important in a parallel transference of value judgment from the rational to the sensate

during the intellectual and cultural flowering of scotland in the 18th century few subjects attracted as much interest among men of letters as aesthetics the study of art from the subjective perspective of human experience all of the great philosophers of the age hutcheson hume smith and reid addressed themselves to aesthetic questions their inquiries revolved around a cluster of issues the nature of taste beauty and the sublime how qualitative differences operate upon the mind through the faculty of taste and how aesthetic sensibility can be improved through education this volume brings together and provides contextual introductions to the most significant 18th century writing on the philosophy of art from the pioneering study of beauty by francis hutcheson through hume s seminal essays on the standard of taste

and tragedy to the end of the tradition in dugald stewart we are swept up in the debate about art and its value that fascinated the philosophers of enlightenment scotland and continues to do so to this day
