with critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action this book tells why changing urban education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education the contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas presenting case studies of original field research in baltimore chicago houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players by demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars it also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved changing urban education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix while its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future

this book brings together the literature in a field which may define the 21st century can economic and technological progress continue with educational systems which seem to answer to no one but themselves and which output graduates who can barely read and write and who have only the faintest clue how to use a map this bibliography provides access via title author and subject indexes contents educational accountability educational change educational equalisation educational leadership educational planning educational indicates

most americans believe that local school districts are the only means by which citizens may exercise control over public education kathryn mcdermott argues to the contrary that existing local institutions are no longer sufficient for achieving either equity or democratic governance not only is local control inequitable it also fails to live up to its reputation for guaranteeing public participation and citizen influence drawing upon democratic theory and the results of field research in new haven connecticut and three suburbs mcdermott contends that our educational system can be made more democratic by centralizing control over funding while decentralizing most authority over schools to the level of schools themselves while enacting public school choice controlled for racial balance to many people in connecticut and elsewhere the tension between equal opportunity for all students and local control of public education seems impossible to resolve in 1996 the connecticut supreme court ruled in sheff v o neill that local control produces unconstitutional segregation of public schools nearly all of the state's 169 towns operate their own public schools and like the towns they serve the schools are generally homogeneous with respect to race and socioeconomic class in the sheff ruling the court declared that making school districts coterminous with town lines is the single most important factor contributing to the present concentration of racial and ethnic minorities in the hartford public school system at the same time the court also acknowledged that the town based school system presently furthers the legitimate nonracial interests of permitting considerable local control and accountability in educational matters in connecticut and elsewhere it has often seemed necessary to choose between local control and equity in public education and local control has almost always won mcdermott argues that rather than seeing local control and equity as conflicting goals policymakers should regard them as equally important components of democracy in public education in her view a truly democratic system of education should both encourage citizen participation in school governance and contribute to the formation and maintenance of a social order in which equality of opportunity prevails over hierarchies of privilege centralizing distribution of resources and using controlled choice to end racial isolation would provide greater equality of opportunity while decentralizing management of schools would expand citizen participation mcdermott's conclusions break new ground in our understanding of local school governance itself and call into question the conventional wisdom about local participation these findings should interest those who study school governance and reform especially in an urban setting as well as policy makers administrators teachers students and citizens eager to improve their schools
