this book opens a new frontier in understanding nonviolence discussions of peace and nonviolence usually focus on either moral theory or practical dimensions of applying nonviolence in conflict situations teaching peace carries the discussion of nonviolence beyond ethics and into the rest of the academic curriculum this book isn't just for religion or philosophy teachers it is for all educators teaching peace begins with a discussion rooted in christian theology where nonviolence is so central and important but it is clear that there are other paths to nonviolence and that one certainly doesn't have to be a christian to practice nonviolence the pieces that follow therefore show how a nonviolent perspective impacts disciplines across the curriculum from acting to biology to mathematics to psychology

the challenges and opportunities of new technologies in the tax field technological developments induced major reforms in the regulatory international and domestic tax landscapes as well as in the developments in the use of technology by tax administrations and taxpayers new technology especially the innovations in virtual asset light cross border business organizations data analytics service and process automation on one hand disrupted the well established legal tax principles and rules and on the other stimulated informed data driven and structured solutions in tax compliance technological advances affected nearly every area and each aspect of taxation direct tax regulations indirect tax law and tax procedures including tax compliance and tax control functions international organizations such as the organization for economic co operation and development oecd the united nations un and the european commission as a supranational organization fostered critical legislative reforms and proposals among which are the oecd two pillar solution to address the tax challenges arising from digitalisation of the economy article 12b of the un model tax convention to tax automated digital services new rules for tracing transfers of crypto assets in the eu as well as the eu s vat e commerce package and vat in the digital age package while these proposals aim to address a wide range of the benefits and challenges of economy 4 0 certain questions arise concerning the consistency of the legislative developments with their initial objectives the appropriateness of the legal form for the economic substance of the regulated relations for the effectiveness of the regulations as well as their coherence this volume contains a collection of scientific chapters on the general topic tax and technology that were successfully completed by the 2022 2023 ll m graduates of the institute for austrian and international tax law wu the volume is divided into three parts that contain the contributions dealing with the impact of the technology on international tax law indirect tax law and procedural law each chapter provides an in depth analysis of a unique research question aiming to innovatively contribute to the current debate and develop a practical approach for implementing the findings

specifics of decision making in modern business systems focuses on the regularities and tendencies that are peculiar for the modern russian practice of decision making in business systems as well as the authors solutions for its optimization in view of new challenges and possibilities

east asia is a powerhouse of automobile production yet across the region national automobile industries have had strikingly different patterns of development despite starting from equally low levels of performance and initially similar strategies countries have experienced vastly different results from thailand s success as an assembly hub for foreign automakers and china s unexpected achievements in building its own car industry to south korea s impressive development of an integrated industry to the philippines persistent weakness these divergent paths offer a fascinating window into the determinants of economic growth the political economy of automotive industrialization in east asia provides a political explanation for why development strategies and performance have been so uneven within one of the world s most important regions utilizing interviews and original language research from multiple nations this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development richard f doner gregory w noble and john ravenhill instead highlight the significance of two sets of factors countries very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions through cross national analyses of china taiwan south korea indonesia malaysia the philippines and thailand the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms brief comparisons with brazil mexico and other

developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science which fail to give sufficient emphasis to the role of public and public private institutions or provide an explanation of the political bases of those institutions in a world where auto assemblers and suppliers are facing new challenges in an ever evolving industry such as the transition to electric and autonomous vehicles this book offers a crucial perspective on the centrality of institutional capacities and political economy by tracing the divergent trajectories of seven nations the political economy of automotive industrialization in east asia offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth

what happens when electric utility monopolies pursue their acquisition interests undisciplined by competition and insufficiently disciplined by the regulators responsible for replicating competition since the mid 1980s mergers and acquisitions of u s electric utilities have halved the number of local independent utilities mostly debt financed these transactions have converted retiree suitable investments into subsidiaries of geographically scattered conglomerates written by one of the u s s leading regulatory thinkers this book combines legal accounting economic and financial analysis of the 30 year march of u s electricity mergers with insights from the dynamic field of behavioral economics

why has our society become so focused on money and at what human cost carol johnston explores the value assumptions of western economic theory revealing what economists contributed and what opportunities were missed as the theory kept narrowing until only market decisions were considered and money became the only reality she then offers a proposal to transform the focus of capitalism from wealth to community and national health

this classic social insurance work has been updated to cover a decade of policy developments and the impact of the recent economic crisis the book includes in depth discussion of all major programs to reduce economic insecurity in the united states including social security medicare workers compensation unemployment compensation and temporary disability insurance the principles characteristics and policy issues associated with social insurance and public assistance programs are discussed in detail the book examines each major cause of economic insecurity and analyzes the appropriate social insurance program for dealing with the problem
