reinforce your knowledge of radiographic positioning and anatomy and produce quality radiographs corresponding to the chapters in Bontrager and Lampignano's textbook of Radiographic Positioning and Related Anatomy 8th edition. This practical workbook offers a wide variety of exercises including situation based questions, film critique questions, laboratory activities and self evaluation tests. A wide variety of exercises include questions on anatomy, positioning, critique and image evaluation with answers at the end of the workbook. Chapter competencies are formatted as a set of tasks that you should be able to perform after working through the material. Situational questions describe clinical scenarios then ask you to apply your knowledge to real life examples. Film critique questions prepare you to evaluate the quality of radiographs and ask what positioning corrections need to be made to improve the image. Laboratory exercises provide hands on experience as you perform radiographs using phantoms. Evaluate the images and practice positioning. Self tests at the ends of chapters help you assess your learning with multiple choice, labeling, short answer and true/false questions. Updated content matches the revisions to the textbook. Stronger focus on computed and digital radiography. In questions includes images from the newest equipment. Expanded coverage of computed tomography reflects changes in practice.

Eye Movement Desensitization and Reprocessing (EMDR) is a powerfully effective treatment for anxiety. In this innovative book, anxiety and EMDR specialist Esther Goldstein outlines mindful self-guided skills to desensitize, alleviate, and in many cases, eliminate past, present, and future experiences of anxiety. Readers will learn powerful techniques to soothe stress quickly, contain anxiety, and reclaim a sense of calm.

Lists and definitions of the most common pathologies likely to be encountered during specific procedures helps you understand the whole patient and produce radiographs that will make diagnosis easier for the physician. Labeled radiographs identify key radiographic anatomy and landmarks to help you determine if you have captured the correct diagnostic information on your images. Evaluation criteria for each projection provide standards for evaluating the quality of each radiograph and help you produce the highest quality images. Clinical indications sections explain why a projection is needed or what pathology is demonstrated to give you a better understanding of the reasoning behind each projection. Increased emphasis on digital radiography keeps you up to date with the most recent advances in technology. Completely updated content offers expanded coverage of important concepts such as digital imaging systems, updated CT information and AART exam requirements. More CT procedures with related sectional images especially for areas such as skull and facial bones.
