rongjin huang examines teachers knowledge of algebra for teaching with a particular focus on teaching the concept of function and quadratic relations in china and the united states 376 chinese and 115 u s a prospective middle and high school mathematics teachers participated in this survey based on an extensive quantitative and qualitative data analysis the author comes to the following conclusions the chinese participants demonstrate a stronger knowledge of algebra for teaching and the chinese participants structure of knowledge of algebra for teaching is much more interconnected chinese participants show flexibility in choosing appropriate perspectives of the function concept and in selecting multiple representations finally the number of college mathematics and mathematics education

courses taken impacts the teachers knowledge of algebra for teaching

mathematics curriculum which is often a focus in education reforms has not received extensive research attention until recently ongoing mathematics curriculum changes in many education systems call for further research and sharing of effective curriculum policies and practices that can help lead to the improvement of school education this book provides a unique international perspective on diverse curriculum issues and practices in different education systems offering a comprehensive picture of various stages along curriculum transformation from the intended to the achieved and showing how curriculum changes in various stages contribute to mathematics teaching and learning in different educational systems and cultural contexts the book is organized to help readers learn not only from reading individual chapters but also from reading across chapters and sections to explore broader themes including identifying what is important in mathematics for teaching and learning in different education systems understanding mathematics curriculum and its changes that are valued over time in different education systems identifying and analyzing effective curriculum practices probing effective infrastructure for curriculum development and implementation mathematics curriculum in school education brings new insights into curriculum policies and practices to the international community of mathematics education with 29 chapters and four section prefaces contributed by 56 scholars from 14 different education systems this rich collection is indispensable reading for mathematics educators researchers curriculum developers and graduate students interested in learning about recent curriculum development research and practices in different education systems it will help readers to reflect on curriculum policies and practices in their own education systems and also inspire them to identify and further explore new areas of curriculum research for improving mathematics teaching and learning

this book explores the impact of curriculum materials on school mathematics and the ways teachers adapt them in practice it introduces research tools for analyzing how curriculum is enacted in classrooms offering insights for researchers educators and curriculum developers seeking to improve instruction and student engagement

in recent years funding agencies like the institute of educational sciences and the national science foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made inroads in

quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community in fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them this volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

as middle school math teachers shift to the common core state standards the question remains what do the standards actually look like in the classroom this book answers that question by taking you inside of real common core classrooms across the country you ll see how exemplary teachers are meeting the new requirements and engaging students in math through these detailed examples of effective instruction you will uncover how to bring the standards to life in your own classroom special features a clear explanation of the big shifts happening in the classroom as a result of the common core state standards real examples of how exemplary teachers are meeting the ccss by teaching problem solving for different learning styles proportional reasoning the pythagorean theorem measurements and more a detailed analysis of each example to help you understand why it is effective and how you can try it with your own students practical ready to use tools you can take back to your classroom including unit plans and classroom handouts

by presenting teacher profiles and sample lessons from across the country this book shows that the nctm standards reflect successful practices of teachers at the grass roots
