organised as a dialogue between nature and design this book explores design ideas opportunities visions and practices through relating and uncovering experience of the natural world presented as an edited collection of 25 wide ranging short chapters the book explores the possibility of new relations between design and nature beyond human mastery and understandings of nature as resource and by calling into question the longstanding role for design as agent of capitalism the book puts forward ways in which design can form partnerships with living species and examines designers capacities for direct experience awe

integrated relationships and new ways of knowing it covers new design ethics of care indigenous perspectives prototyping with nature methods for new design and nature relations a history of design and nature animist beliefs de centering human centered design understanding nature has power and agency design and nature a partnership is a rich resource for designers who wish to learn to engage with sustainability from the ground up

in 1969 ian mcharg s seminal book design with nature set forth a new vision for regional planning using natural systems to celebrate its 50th anniversary a team of landscape architects and planners from penndesign have showcased some of the most advanced ecological design projects in the world today written in clear language and featuring vivid color images design with nature now demonstrates mcharg s enduring influence on contemporary practitioners as they contend with climate change and other 21st century challenges

one of the legendary figures in twentieth century landscape design ian mcharg transformed the fields of landscape architecture and planning through his personal methodology his unique curriculum at the university of pennsylvania and his own inspired writing in classic texts such as his landmark 1969 book design with nature mcharg painted an incredibly rich and exuberant picture of the organic world while conjuring up a vision of a more wholesome and productive metropolis in this new entry in the popular conversations with students series we are proud to make mcharg s never before in print lecture collaboration with nature available for the first time captured on tape in the 1970s the lecture is the sequel to design with nature this is a must read for anyone in the fields of landscape architecture environmental science and urban planning

a concise illuminating collection of essential essays from one of the pioneers of the field of landscape architecture

this volume contributes to the construction of a multi voice mosaic on the theme of nature and the relationship between man understood as designer and nature by emphasizing the innovative and sustainable proposals coming from the discipline of design in its many facets and interdisciplinary contributions since it isn t discussed the creative and economic effort that designers institutions and companies have been leading for years to improve human living conditions preference will be given to scientific contributions unpublished or not yet fully known case studies projects of strategies products systems and services theoretical contributions communication that are an expression of a new approach to nature seen as our ally and object of an ethics of care the focus is the design both in its role as innovation driver and interpreter of social evolution that must be considered within the human nature relationship the topics identify some of the most relevant fields of development in which design driven innovation can be developed in the respect of perspective of a new relationship with nature

the culture of nature in the history of design confronts the dilemma caused by design's pertinent yet precarious position in environmental discourse through interdisciplinary conversations about the design of nature and the nature of design demonstrating that the deep entanglements of design and nature have a deeper and broader history than contemporary discourse on sustainable design and ecological design might imply this book presents case studies ranging from the eighteenth to the twenty first century and from singapore to mexico it gathers scholarship on a broad range of fields practices from urban planning landscape architecture and architecture to engineering design industrial design furniture design and graphic design from adobe architecture to the atomic bomb from the bonsai tree to biosphere 2 from pesticides to photovoltaics from rust to recycling the culture of nature permeates the history of design as an activity and a profession always operating in the borderlands between human and non human environments design has always been part of the environmental problem whilst also being an indispensable part of the solution the book ventures into domains as diverse as design theory research pedagogy politics activism organizations exhibitions and fiction and trade literature to explore how design is constantly making and unmaking the environment and conversely how the environment is both making and unmaking design this book will be of great interest to a range of scholarly fields from design education and design history to environmental policy and environmental history

design in engineering and science has often been inspired by nature this has been more evident in recent years after a period during which our civilization thought in terms of taming rather than working in harmony with nature the consequences of that approach are still with us and have resulted in a world increasingly homogenized lacking in biodiversity and with increased pollution mankind has been slow to learn and even slower to apply the lessons that nature offers in spite of the urgency of our predicament this book contains papers presented at the fourth international conference on comparing design in nature with science and engineering the emphasis of this volume is on engineering and architectural applications and on biomimetics reflecting in some measure current interest in finding environmentally friendly solutions which also optimize the use of natural resources the contributions have been arranged into the following topics biomimetics shape and form in engineering nature nature and architectural design natural materials and surfaces complexity and education

throughout history many leading thinkers have been inspired by the parallels between nature and human design in mathematics engineering and other areas this book publishes the results of a conference on the significance of nature for design

at one with nature is an inspiring collection of the latest work of ken yeang that further advances sustainable architecture and design this collection features recent projects as he explores how we can achieve harmony between the natural and our built environments to create a better planet by design each project features and highlights not only the systems and devices adopted but also outlines the intentions and ecological considerations demonstrating best practices for how we can proceed moving forward the book role models our living earth and shows how we can behave as stewards of our planet cassia patel oceanic global

foundation at one with nature showcases ken yeang s latest ideas built projects designs research work and advances in the field of designing with nature a topic that yeang has pioneered and developed over many decades since receiving his doctorate in ecological design and planning from cambridge university his ideas and work are even more pertinent today with the current state of devastation of earth s natural systems and a biogeochemical cycle that has been extensively and severely impacted by human society the global environment today is in a state of crisis but what can society do to address the issues yeang s recent projects are presented with instructive diagrams that provide a basis for action for architects planners designers engineers and anyone whose daily work impinges on the natural environment offered in a highly visual annotated format with instructive illustrations of yeang s theoretical books on the topic at one with nature is an invaluable resource that students and academics interested in designing with nature will find both informative and relevant
