covering all the key topics of geomorphology for a level this text also relates concepts and ideas to students own lives it includes sections on aspects of landscape earth structure and landscape rocks and landscape slopes and the role of hydrology in the landscape

the word terrain refers to the surface characteristics of the ground that surrounds us terrain forms the skeleton of our landscape underlining our homes and gardens and ultimately giving us our food clothing and building materials we see it daily on our way to work we view it from the plane window as we travel abroad we seek its charms when on holiday the trails we walk the beaches we lie on and the mountain views that entrance us the object of this book is to explain the reasons for the forms and variations of terrain so that we may have a fuller understanding and appreciation of its practical values and charms these fascinate the rambler cyclist and climber but also to the driver and casual visitor the title of this book is landform and terrain the physical geography of landscape these terms have related and somewhat overlapping meanings we use the term terrain for the bare surface of the ground not including vegetation cover by landform we mean the combination of terrain and vegetation which is dependent on climate the actions of water and often of human activity landscape refers to the overall character geographical area which may include several different types of terrain and landform our aim has been to bring together geology soil climate and

hydrology in such a way as to give the observer an overall view of the landscape he or she sees around them full illustrated colin mitchell was the son of a landscape painter after a year at harvard and oxford he worked as a soil surveyor in sudan iraq and pakistan obtaining a doctorate in terrain studies from cambridge an fao consultant in china saudi arabia ethiopia and tanzania he is author of the book terrain evaluation and landscape walks in sussex and joint author of phytogeomorphology his special interest is encouraging everyone and especially young people to study and understand the landscapes around them

a stimulating introduction this book explores the concept of landscape in theories and writings of the last twenty to thirty years to aid students in fully comprehending this vast and complex topic

the cultural landscapes of central european cities reflect over half a century of socialism and are marked by the marxists vision of a utopian landscape architecture urban planning and the visual arts were considered to be powerful means of expressing the people s power however since the velvet revolutions of 1989 this urban scenery has been radically transformed by new forces and trends infused by the free market democracy and liberalization this has led to landscape cleansing and recycling as these former communist nations used new architectural functional and social forms to transform their urbanscapes their meanings and uses comparing case studies from different post socialist cities this book examines the culturally conditional variations between local powers and structures despite the similarities in the general processes and systems it considers the contemporary cultural landscapes of these post socialist cities as a dynamic fusion of the old communist forms and new free market meanings features and democratic practices of global influences and local icons the book assesses whether these urbanscapes clearly reflect the social cultural and political conditions and aspirations of these transitional countries and so a critical analysis of them provides important insights

now in a fourth edition this standard student reference has been totally revised and updated it remains the definitive introduction to the history philosophy and methodology of human geography now including a detailed explanation of key ideas in human geography s post modernist and post structuralist turns the book is organized into six sections what is geography an introduction to the discipline and a discussion of its organization and basic research approaches informed by the question what difference does it make to think geographically foundations of geography an examination of geography from antiquity to the 1950s with a special focus on human environment relation geography 1950 1980 a critical review of the development of geography as a spatial science paradigms and revolutions an analysis of paradigm shifts in geography introducing students to key debates in the philosophy of science positivism and its critics a detailed discussion of positivism critical theory humanistic geography behavioural geography and structuralism new trends and ideas developing critical responses structuration theory realism post structuralism post modernism feminism and actor network theory this text explores complex ideas in an intelligible and accessible style illustrated throughout with research examples and explanations in text boxes questions for discussion at the end of each chapter and a concept glossary this is the essential student companion to the discipline

in the twenty first century housing has become a site of ecological experimentation and

environmental remediation from the vantage point of contemporary architecture conservation concerns and emergent building science technologies support one another with new processes and materials deployed to reduce energy usage water consumption and carbon dioxide emissions landscapes of housing examines this trend in historical perspective arguing for a more considered environmental vision that includes the organic social and cultural dimensions of landscape by shifting the focus from architecture the book highlights and critiques the relationship between dwelling and landscape itself contributors from a wide range of international perspectives propose a more integrative ecology that includes history culture society and materiality in addition to technology within contemporary ecological housing programs this book will be a resource for upper level students academics and researchers in landscape architecture interested in the social and political implications of ecological housing

the dictionary of human geography even better than before the dictionary is an essential tool for all human geographers and over the years has provided an invaluable guide to the changing boundaries and content of the discipline no one can afford to be without this fifth edition linda mcdowell university of oxford from explanations of core concepts and central debates to lucid discussions of the theories driving contemporary research this is the best conceptual map to the creative and critical thinking that characterises contemporary human geography the fifth edition belongs on the bookshelf of all serious students gerard toal virginia tech with an exceptional balance between breadth and depth this is undoubtedly a timely and ground breaking revision of the dictionary an outstanding accomplishment of the editors and contributors and a comprehensive and essential reference for any student or scholar interested in human geography mei po kwan ohio state university i can't imagine life without it definitive detailed yet accessible there's still no single volume reference work in the field to rival it noel castree university of manchester the dictionary of human geography represents the definitive guide to issues and ideas methods and theories in human geography now in its fifth edition this ground breaking text has been comprehensively revised to reflect the changing nature and practice of human geography and its rapidly developing connections with other fields the major entries not only describe the development of concepts contributions and debates in human geography but also advance them shorter definitional entries allow quick reference and coverage of the wider subject area changes to the fifth edition include entries from many new contributors at the forefront of developments in the field and over 300 key terms appearing for the first time it features a new consolidated bibliography along with a detailed index and systematic cross referencing of headwords the dictionary of human geography continues to be the one guidebook no student instructor or researcher in the field can afford to be without

lush and green the beauty of ireland's landscape is legendary the atlas of the irish rural landscape has harnessed the expertise of dozens of specialists to produce an exciting and pioneering study which aims to increase understanding and appreciation for the landscape as an important element of irish national heritage and to provide a much needed basis for an understanding of landscape conservation and planning essentially cartographic in approach the atlas is supplemented by diagrams photographs paintings and explanatory text regional case studies covering the whole of ireland from north to south are included along with historical background the impact of human civilization upon ireland's geography and environment is well documented and the contributors to the atlas deal with contemporary changes in the landscape resulting from developments in irish

agriculture forestry bog exploitation tourism housing urban expansion and other forces the atlas of the rural irish landscape is a book which aims to educate and inform the general reader and student about the relationship between human activity and the landscape it is a richly illustrated beautifully written and immensely authoritative work that will be the guide to ireland s geography for many years to come

this major new text provides an introduction to the interaction of culture and society with the landscape and environment it offers a broad based view of this theme by drawing upon the varied traditions of landscape interpretation from the traditional cultural geography of scholars such as carl sauer to the new cultural geography which has emerged in the 1990s the book comprises three major interwoven strands first fundamental factors such as environmental change and population pressure are addressed in order to sketch the contextual variables of landscapes production second the evolution of the humanised landscape is discussed in terms of processes such as clearing wood the impact of agriculture the creation of urban industrial complexes and is also treated in historical periods such as the pre industrial the modern and the post modern from this we can see the cultural and economic signatures of human societies at different times and places finally examples of landscape types are selected in order to illustrate the ways in which landscape both represents and participates in social change the authors use a wide range of source material ranging from place names and pollen diagrams to literature and heritage monuments superbly illustrated throughout it is essential reading for first year undergraduates studying historical geography human geography cultural geography or landscape history

landscapes is a timely and well written analysis of the meaning of cultural landscapes the book delves into the layers of meaning that are invested in ordinary landscapes as well as landscapes of spectacle and power landscapes is a powerful and vivid application of the new cultural geography to case studies not previously visited within cultural geography texts

defining the key terms that inform the language of geography and define the geographical imagination space time place scale landscape this volume provides definitions of terms from both human and physical geography

incorporating text and art this essential study tool contains chapter notes with key terms and page references as well as questions for review
