in 2007 the monash kings college london international centre for the study of science and mathematics curriculum edited a book called the re emergence of values in science education

this book reflects on how values have been considered since this original publication particularly in terms of socio cultural economic and political factors that have impacted broadly on science technology and society and more specifically on informal and formal science curricula hence the title of this book has been framed as values in science education the shifting sands as in the first book this collection focuses on values that are centrally associated with science and its teaching and not the more general notion of values such as cooperation or teamwork that are also important values in current curricula such values have indeed become more of a focus in science education this may be a response to the changing global context where technological changes have been rapid and accelerating in such complex and risky environments it is our guiding principles that become the important mainstays of our decisions and practices in terms of science education what is becoming clearer is that traditional content and traditional science and scientific methods are not enough for science and hence science education to meet such challenges while shifts in values in science education continue tensions remain in curriculum development and implementation as evidenced by the continued diversity of views about what and whose values matter most

this fifth collection of tom stoppard s plays brings together five classic plays by one of the most celebrated dramatists writing in the english language the collection includes the real thing night day hapgood indian ink and arcadia about which the reviewer for the daily telegraph said i have never left a new play more convinced that i d just witnessed a masterpiece

this volume explores how teacher educators engage in professional learning and development across their careers it covers content developments pedagogical practices reflective competencies and balancing teaching with institutional expectations learning spaces include communities of practice critical friendships and co mentoring
