armed conflict and military activities have serious adverse impacts on the environment modern weaponry troop movements landmines hazardous military waste and the destruction of forests for military use are a few sources of harm to the environment both during armed conflict and peacetime military activities ecological assaults in combat areas are often kept a secret by the government resulting in even greater humanitarian and environmental harm environmental degradation is increasingly being recognized as one of the most significant challenges of the 21st century and its effects are being felt worldwide both domestic and international legislations have been inadequate in mitigating the impact of military activities this book provides details of the environmental destruction wreaked during international and non international armed conflicts and argues that the existing legal regime for the protection of the environment during armed conflict requires substantial modification it puts forward the view that though it is inconceivable to impose an absolute ban on environmental damage during military operations strengthening and clarifying the existing laws protecting the environment in times of conflict and enforcing environment friendly practices among military forces could go a long way in protecting natural assets of our earth

the end of the cold war has opened up the arena for increased attention to other lines of conflict both in europe and globally environmental disruption by no means a new phenomenon is a chief beneficiary of the shift in priorities in the public debate the scientific and environmental affairs division of nato has moved with the times and has defined environmental security as one of the priority areas for its

cooperation with central and eastern europe and countries of the former soviet union research on these issues is now thus very much a collaborative effort across former lines of division in europe the introduction by sverre stub sets the tone our future common or none at all the book reveals the very real risks associated with environmental degradation whether of the land waters or the oceans and charts out previous disputes and points to the very real danger of violent conflict associated with the drying up of natural resources the book ends with a section on responses which seeks to provide answers to the threats discussed in the preceding sections

drawing on a range of international examples libby lester invites readers to develop a nuanced understanding of changing media practices and dynamics by connecting local national and global environmental issues journalistic practices and news sources public relations and protests and the symbolic and strategic circulation of meanings in the public sphere

proceedings of the nato advanced research workshop budapest hungary from 21 to 23 january 1999

the tension between trade liberalisation and environmental protection has received remarkable attention since the establishment of the wto it has been the subject of a wide ranging debate and is one of the central themes of the anti globalisation movement this book explores that debate it argues that by focusing on the wto the debate has failed to recognise the institutional and discursive complexity in which the trade environment conflict is embedded a legal investigation of this nexus requires a framework of inquiry in which this complexity can be elucidated a model of global legal pluralism the first theoretical part of the book chapters one and two responds to this challenge by developing a pluralistic model which recognises the trade and environment conflict as the product of multiple dilemmas constituted and negotiated by a myriad of institutional and discursive networks as such this conflict cannot be understood or addressed through one dimensional models viewing the trade environment conflict through a pluralistic perspective yields important practical insights it means that this conflict cannot be resolved by uniform economic or legal formulae dealing with this conflict requires

rather polycentric and contextual strategy the empirical part of the book chapters three to seven explicates this thesis by examining several global legal domains ranging from the wto to private transnational regimes such as transnational litigation international construction law and international financial law this part demonstrates how the different discursive and institutional structures of these domains have influenced the contours of the trade environment conflict and considers the policy implications of this diversity from a pro environmental perspective

this book shows the push and pull effects between resources human security and conflicts in africa it recognizes the need for resources in africa to be processed into finished goods in order to influence global market and redefine the pattern of trade relations with powerful countries of asia america and europe in shaping the destiny and future of african countries the achievement of this laudable objective is plagued by the security challenges which are directly or indirectly linked to resource related conflicts rocking most of the resource endowed countries in the continent thereby threatening global peace and security to deal with this menace in the continent it requires global co operation and support of foreign governments international organizations international non government organizations governments of host countries and its citizens the book presents the cases and experiences of countries that are endowed with resource as well as have experienced different forms of human insecurity and have witnessed environmental conflicts in its analysis which make the discourse interesting and quite educating

conflicts frequently arise over environmental issues such as land use natural resource management and laws and regulation emerging from diverging interests and values among stakeholders this book is a primer on causes of and solutions to such conflicts it provides a foundational overview of the theory and practice of collaborative approaches to managing environmental disputes joshua d fisher explains the core concepts in collaborative conflict management and presents a clear practical and implementable framework for understanding and responding to environmental disputes he details strategies to bring stakeholders together in pursuit of collective solutions emphasizing ongoing processes of dialogue

analysis action and learning this collaborative approach can create new opportunities for stakeholders to better understand each other and the natural world which enables more effective and context appropriate environmental governance the primer examines why and how system dynamics can constrain or expand the possibility of constructive management of conflicts it features a case study from the amazon basin where local communities extractive industry operators conservationists and land managers have often clashed over access to natural resources drawing out lessons to illustrate how to adapt the conflict management framework to distinct contexts managing environmental conflict synthesizes knowledge methods and practices spanning consensus building collaborative governance complex adaptive systems science environmental conflict resolution and environmental peacebuilding its presentation of this important and timely topic will be invaluable for academics and practitioners alike including decision makers scientists and conflict management professionals

in this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the middle east and north africa europe and north america review security and conflict prevention in the mediterranean they also analyse nato s mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in north and south the latter half of the book analyses environmental security and conflicts in the mediterranean and environmental consequences of world war ii the gulf war the balkan wars and the middle east conflict it also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the mediterranean in the 21st century

resolving a conflict is based on the art of helping people with disparate points of view find enough common ground to ease their fears sheath their weapons and listen to one another for their common good which ultimately translates into social environmental sustainability for all generations written in a

clear concise style resolving environmental conflicts principles and concepts third edition is a valuable solution oriented contribution that explains environmental conflict management this book provides an overview of environmental conflicts collaborative skills and universal principles to assist in re thinking and acting toward the common good integrates a variety of new real world conflicts as a foundation for building trust skills consensus and capacity and explains pathways to collectively construct a relationship centric future fostering healthier interactions with one another and the planet the new edition illustrates how to successfully mediate actual environmental disputes and how to teach conflict resolution at any level for a wide variety of social environmental situations it adds a new chapter on water conflicts and resolutions providing avenues to healthy sustainable and effective outcomes and provides new examples of conflicts caused by climate change with discussion questions for clear understanding land use planners urban planners field biologists and leaders and participants in collaborative environmental projects and initiatives will find this book to be an invaluable resource university students in related courses will also benefit as will anyone interested in achieving greater social environmental sustainability and a more responsible use of our common natural resources for themselves and their children

the aim of this book is to demonstrate how environmental factors have caused an evolution in the landscape of national security since the end of the cold war through relevant case studies the scope of the problem on the national security landscape due to environmental stressors is illuminated examined and synthesized with climate related data human variables such as governance gdp and vulnerability are taken into account and are compared against environmental factors to more accurately determine the causative agents of regional conflicts which threaten national security these case studies comprise the majority of the text and they show how individual conflicts are uniquely influenced by environmental stress with variations from situation to situation this book will be of interest to government and military professionals and may serve as a resource for college courses in the areas of military geography international affairs and sustainability studies

as environmental security gains increasing attention there is a pressing need for rigorous examinations of environmental causes of conflict and the potential for conflict resolution environmental conflict explores the role of environmental degradation or scarcity in intrastate or interstate violent conflict and how cooperative efforts might forestall such undesirable consequences by presenting cutting edge conceptual and empirical research examining how environmental factors may influence group and state decisions to employ violence this book enhances understanding of the possibilities for future conflict and how to prevent it

true progress toward an ecologically sound environment and a socially just culture will be initially expensive in money and effort the longer we wait however the more disastrous the environmental condition will become the more disputes will arise as a result of our declining quality of life and the more expensive and difficult the necessary social changes will be the second edition of a bestseller resolving environmental conflicts demonstrates how to practice the type of conflict resolution that not only settles a dispute but also heals the people once the consultants and mediators leave the work must go on this second edition covers the basic transformative concepts vital for resolving environmental conflicts it includes discussions of the inviolate biophysical principles how the english language is changing as well as the critical principles of social behavior it also examines new dynamics in making decisions along with the effects of the younger generations shifting their interests from nature oriented interest to technologically oriented interests and their subsequent lack of understanding the importance of the natural environment to a sustainable society no biological shortcuts technological quick fixes or political rhetoric can mend what is broken dramatic fundamental change is necessary if we are really concerned with bettering the quality of life it is not a question of can we change or can t we but one of will we change or won t we change is a choice a choice of individuals reflected in the collective of society and mirrored in the landscape throughout the generations considerably more than a how to directive this book examines the whys of the mediation process and broadens the knowledge base by providing the philosophical underpinnings of a new environmental responsibility

environmental conflict and cooperation explores the evolution of environmental conflict as a field of research and the study of cooperation as an alternative to war over four key parts james r lee navigates the contours of this growing field and paints a vivid framework for better understanding issues around environmental conflict and security the premise of the field and its historic manifestations the definition and purpose of research the persuasions or types of environmental conflict and cooperation the promise of research in leading to better decision making and to broaching new challenges over the course of these parts the author outlines the deep historic record of this discipline arguing that it will play a key role in understanding important future trends utilizing a wide variety of case studies that range from ancient examples including conflict over the cedars of lebanon and the role of tin in the peloponnesian wars to future oriented scenarios including expanded island building in the south china sea and the global politics of geo engineering lee highlights key concepts metrics and policy contexts that will test current understandings he also examines a variety of research methods and provides examples of the ways in which such research can be used to inform policy improvements this book will draw specific interest from students and scholars of environmental conflict and cooperation as well as researchers of environmental politics and security studies

the impact of environmental damage on human rights civil political or welfare and labour rights is becoming ever more widely appreciated and has direct bearing on the behaviour of companies and their norms of conduct in this volume contributors draw on the tools and insights of a range of disciplines including law anthropology economics geography and social science to analyze the issues and show how new standards that protect rights and liberties can be established

environmental protection security and armed conflict is a timely reminder of the need to integrate sustainable development into key areas of international law including all phases of armed conflict onita das cleverly picks her way through the applicable law and derives solid suggestions for the future karen hulme university of essex uk this book explores environmental protection relevant to security and armed conflict from a sustainable development perspective the author details how at each stage of the armed

conflict life cycle policy law and enforcement have fallen short of the sustainable development model and concludes with a set of suggestions for how to address this pressing concern the book considers and discusses environmental protection relevant to security and armed conflict from a holistically sustainable development perspective environmental protection relevant to security and armed conflict in the life cycle of armed conflict pre conflict in conflict and post conflict uses substantive sustainable development principles duty of states to ensure sustainable use of natural resources equity and the eradication of poverty common but differentiated responsibilities precautionary principle public participation good governance integration and interrelationship and polluter pays principle as tools or objectives to achieve sustainable development in the context of environmental protection relevant to security and armed conflict the concept of sustainable development is utilized to fill the gaps left by policy and law in the field of environmental protection relevant to security and armed conflict the book also examines 5 case studies relating to somalia darfur sudan sierra leone the first gulf war and the kosovo conflict this fascinating and detailed study will strongly appeal to academics and postgraduate students in the fields of both environmental protection and international law researchers policy makers ngos and individuals working in the field

using a case study of the trio indigenous peoples in suriname conflict and sustainability in a changing environment presents an inside view of a community facing climate change and on the path toward sustainable development smith and bastidas take the reader beyond an examination of examples from the field of practice and into a thorough case study on climate change with more than ten years of field experience smith and bastidas present an in depth bottom up analysis of sustainable development including tools for practitioners insight for academics and advice to policymakers
