--- **Sample Medical Ethics MCQs and How to Approach Them** Let's explore some sample questions, dissecting their reasoning and principles involved.

Example 1: Informed Consent Question: A 65-year-old patient with advanced cancer refuses chemotherapy after being fully informed about the benefits and risks. The healthcare team respects her decision. This situation exemplifies:

- a) Paternalism
- b) Autonomy
- c) Beneficence
- d) Non-maleficence

Analysis: The correct answer is b) Autonomy. The patient has the right to refuse treatment after being informed, which upholds her autonomy. Paternalism (a) would involve overriding her decision, which is not the case here. Beneficence (c) and non-maleficence (d) relate to acting in the patient's best interest and avoiding harm but do not directly address the patient's refusal.

Example 2: Confidentiality Question: A physician learns that a patient has a contagious disease. Under which circumstance can the physician breach confidentiality?

- a) When the patient refuses treatment
- b) To prevent harm to others
- c) When the patient is a minor
- d) Confidentiality should never be breached

Options (a) and (c) involve other considerations, but breach of confidentiality is generally justified only in specific circumstances like public health threats. Option (d) is incorrect because confidentiality isn't absolute.
