this companion to the classical quarterly contains reviews of new work dealing with the literatures and civilizations of ancient greece
and rome over 300 books are reviewed each year

since the renaissance at least the medium of sculpture has been associated explicitly with the sense of touch sculptors philosophers
and art historians have all linked the two often in strikingly different ways in spite of this long running interest in touch and tactility it
is vision and visuality which have tended to dominate art historical research in recent decades this book introduces a new impetus to
the discussion of the relationship between touch and sculpture by setting up a dialogue between art historians and individuals with
fresh insights who are working in disciplines beyond art history the collection brings together a rich and diverse set of approaches
with essays tackling subjects from prehistoric figurines to the work of contemporary artists from pre modern ideas about the
physiology of touch to tactile interaction in the museum environment and from the phenomenology of touch in recent philosophy to
the experimental findings of scientific study it is the first volume on this subject to take such a broad approach and as such seeks to
set the agenda for future research and collaboration in this area

touch is the first sense to develop in the womb yet often it is overlooked the senses of touch examines the role of touching and
feeling as part of the fabric of everyday embodied experience how can we think about touch problems of touch and tactility run as a
continuous thread in philosophy psychology medical writing and representations in art from ancient greece to the present day
picking through some of these threads the book feels its way towards writing and thinking about touch as both sensory and affective
experience taking a broadly phenomenological framework that traces tactility from aristotle through the enlightenment to the
present day the book examines the role of touch across a range of experiences including aesthetics digital design visual impairment
and touch therapies the senses of touch thereby demonstrates the varieties of sensory experience and explores the diverse range of
our senses of touch

from the softest caress to the harshest blow touch lies at the heart of our experience of the world now for the first time this deepest of senses is the subject of an extensive historical exploration the deepest sense a cultural history of touch fleshes out our understanding of the past with explorations of lived experiences of embodiment from the middle ages to modernity this intimate and sensuous approach to history makes it possible to foreground the tactile foundations of western culture the ways in which feelings shaped society Constance Classen explores a variety of tactile realms including the feel of the medieval city the tactile appeal of relics the social histories of pain pleasure and affection the bonds of touch between humans and animals the strenuous excitement of sports such as wrestling and jousting and the sensuous attractions of consumer culture she delves into a range of vital issues from the uses and prohibitions of touch in social interaction to the disciplining of the body by the modern state from the changing feel of the urban landscape to the technologization of touch in modernity through poignant descriptions of the healing power of a medieval king's hand or the grueling conditions of a nineteenth century prison we find that history far from being a dry and lifeless subject touches us to the quick

the main themes of this volume are the identification of visions messages and meanings in various facets of byzantine culture and the possible differences in the perception of these visions messages and meanings as seen by their original audience and by modern scholars the volume addresses the methodological question of how far interpretations should go whether there is a tendency to read too much into too little or whether not enough attention is paid to apparent minutiae that may have been important in their historical context as the essays span a wide chronological era they also present a means of assessing the relative degrees of continuity and change in byzantine visions messages and meanings over time thus as highlighted in the concluding section the book discusses the validity of existing notions regarding the fluidity of byzantine culture when continuity was a matter of a rigid adherence to traditional values and when a manifestation of the ability to adapt old conventions to new circumstances and it shows that in some respects byzantine cultural history may have been less fragmented than is usually assumed similarly by reflecting not just on new interpretations but also on the process of interpreting itself the contributors demonstrate how research within byzantine studies has evolved over the past thirty years from a set of narrowly defined individual disciplines into a broader exploration of interconnected cultural phenomena

this thoroughgoing study examines the doctrine of transubstantiation from historical theological and ecumenical vantage points

brett salkeld explores eucharistic presence in the theologies of aquinas luther and calvin showing that christians might have more in common on this topic than they have typically been led to believe as salkeld corrects false understandings of the theology of transubstantiation he shows that luther and calvin were much closer to the medieval catholic tradition than is often acknowledged the book includes a foreword by michael root
