round read not only as a primer for IPI certification but as an excellent introductory text on GNU Linux in all this is a valuable addition to O'Reilly's already packed stable of Linux titles and I look forward to more from the author first Monday.

Covering the principles of planning, cost effectiveness, waste reduction, efficiency, population health management, patient engagement, and prevention, this text is designed for those who will be responsible for managing systems and information in health systems and provider organizations.

Use of a structured fact finding approach that is based on sound clinical judgment and applied flexibility facilitates good clinical decision making and patient care in neuropsychology. This casebook is a standardized approach to fact finding that training programs at various levels can use to help trainees develop significant evaluation skills such as case conceptualization, differential diagnosis, and recommendations for patients with a wide range of presenting problems.

In October 2016, the Council on Education in Public Health (CEPH) released new competencies that all accredited Master of Public Health (MPH) programs must adhere to. Master of Public Health Competencies: A Case Study Approach covers each of the 22 required competencies to demonstrate how they can be applied in public health practice, spanning all five key disciplines of public health: biostatistics, epidemiology, health policy and management, social and behavioral sciences, and environmental and occupational health. Master of Public Health Competencies covers the full breadth of public health, each chapter is focused on a single CEPH competency and provides the background of the public health issue followed by a case study to learn that competency and understand its application. Written by MPH faculty and community practitioners and based on real world public practice, these concise case studies are accompanied by discussion questions that facilitate classroom discussion.

Linux deployment continues to increase and so does the demand for qualified and certified Linux system administrators. If you're seeking a job based certification from the Linux Professional Institute (LPI), this updated guide will help you prepare for the technically challenging LPI's Level 1 exams 101 and 102. The third edition of this book is a meticulously researched reference to these exams, written by trainers who work closely with LPI. You'll find an overview of each exam, a summary of the core skills you need, review questions, and exercises as

well as a study guide a practice test and hints to help you focus major topics include critical gnu and unix commands linux installation and package management devices and filesystems text editing processing and printing the x window system networking and security mail transfer agents email ftp and web services these exams are for junior to mid level linux administrators with about two years of practical system administration experience you should be comfortable with linux at the command line and capable of performing simple tasks including system installation and troubleshooting

companies ranging from ibm to novell are dramatically expanding linux training and development certification will be a key part of this trend and support is growing for an industry wide linux certification program most companies want a vendor neutral certification initiative and the linux professional institute lpi is the leading effort in this direction as more corporations adopt linux as the networking backbone for their it systems the demand for certified technicians will become even greater lpi linux certification in a nutshell prepares system administrators for the basic lpi general linux 101 exam and the more advanced 102 exam and includes information on objectives and test suggestions it also provides readers who aren't planning to take the exam with an excellent understanding of the targeted linux concepts and functions the book is divided into two parts one for each of the lpi exams each part features a summary of the exam a highlighter's index labs suggested exercises and practice exams to help you pass the lpi exams with flying colors part i covers the general linux 101 exam gnu and unix commands devices linux filesystems and the filesystem hierarchy standard boot initialization shutdown and run levels documentation administrative tasks part ii covers the general linux 102 exam linux installation and package management the linux kernel text editing processing and printing shells scripting programming and compiling x windows networking fundamentals network services security for those preparing to take the lpi linux certification exams this book will prove to be invaluable in its scope and breadth linux newbies will also find this book useful for learning more about how to use their linux system jeffrey dean is a red hat certified engineer rhce with professional experience in it management and training delivery
