This guide addresses planning, requirements gathering, coding, documentation, user interfaces, and much more.

Programming by Design provides the basis for a course in computer programming concepts and techniques covering structured design and coding, GUI application development, and an introduction to object-oriented programming concepts. It takes a language-independent, design-oriented approach to the teaching of programming rather than rely on a specific programming language. It aims at building attitudes and skills that will allow students to tackle and successfully apply any programming or database language. The philosophy of the text is that the student will develop transferable programming design and language learning skills rather than repetitively learning a specific programming language.
