for a long time economic research on africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field this was understandable the reputation of africa centered economic research was not enhanced by the well known limitations of economic data across the continent moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the great recession times have changed many leading researchers including a few nobel laureates have taken the subject of africa and economics seriously enough to devote their expertise and creativity to it they have been amply rewarded the richness complexities and subtleties of african societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world in collecting some of the most authoritative statements about the science of economics and its concepts in the african context this lhandbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on africa and africa s contribution to the discipline the editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

methods just as diseases or scientists have their own history it is important for scientists to be aware of the genesis of the methods they use and of the context in which they were developed a history of epidemiologic methods and concepts is based on a collection of contributions which appeared in spm international journal of public health starting in january 2001 the contributions focus on the historical emergence of current epidemiological methods and their relative importance at different points in time rather than on specific achievements of epidemiology in controlling plagues such as cholera tuberculosis malaria typhoid fever or lung cancer the papers present the design of prospective and retrospective studies and the concepts of bias confounding and interaction the compilation of articles is complemented by an introduction and comments by prof alfredo morabia which puts them in the context of current epidemiological research

the book presents a wide range of research at the interesection of linguistics and literary studies its first part focuses on cultural linguistics and cognitive linguistics in particular metaphor research in the second part of the book a set of issues related to cultures and narratives are presented these include timely discussions on various aspects of discourse ranging from online and media discourse to literary analyses and issues related to ai
