this stimulating very short introduction to music invites us to really think about music and the values and qualities we ascribe to it the world teems with different kinds of music traditional folk classical jazz rock pop and each type of music tends to come with its own way of thinking drawing on a wealth of accessible examples ranging from beethoven to chinese zither music nicholas cook attempts to provide a framework for thinking about all music by examining the personal social and cultural values that music embodies the book reveals the shortcomings of traditional conceptions of music and sketches a more inclusive approach emphasizing the role of performers and listeners about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

with a broad scope across the millennia from high literature to popular culture between page and stage and screen this very short introduction considers comedy not only as a literary genre but also as a broader impulse at work in many other historical and contemporary forms of satire parody and play

where did we come from why are we here is there a god in our modern world many people yearn for answers to these most fundamental of life s questions having become disillusioned with trite explanations and troubled by

narratives that deny their intuitive spirituality beginning with some of our most ancient ancestors wakan tanka traces the evolution of humanity through the ages citing paleontological and archaeological discoveries along with recent genetic evidence it recounts how mankind evolved from the earliest mammals into anatomically and behaviourally modern humans wakan tanka describes how human culture and spirituality evolved in concert with anatomy showing how humankind has since very ancient times had an instinctual moral sense it discusses how our spirituality has given us an appreciation for both the aesthetic and divine aspects of life as reflected in our cultures and artistic endeavours by comparing philosophical and religious views of creation with modern scientific theory wakan tanka reaches the conclusion that rather than conflicting these views are remarkably similar and equally valid ways of describing the same reality indeed our scientific knowledge and spiritual beliefs can be harmonized providing us with a deeper understanding of ourselves of creation and of life's purpose

most of us recognize that organizations are everywhere you meet them on every street corner in the form of families and shops study in them work for them buy from them pay taxes to them but have you given much thought to where they came from what they are today and what they might become in the future how and why do they have so much influence over us and what influences them how do they contribute to and detract from the meaningfulness of lives and how might we improve them so they better serve our needs and desires this very short introductions addresses all of these questions and considers many more mary jo hatch introduces the concept of organizations by presenting definitions and ideas drawn from the a variety of subject areas including the physical sciences economics sociology psychology anthropology literature and the visual and performing arts drawing on examples from prehistory and everyday life from the animal kingdom as well as from business

government and other formal organizations hatch provides a lively and thought provoking introduction to the process of organization about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

the first encyclopedia in the field the international encyclopedia of ergonomics and human factors provides a comprehensive and authoritative compendium of current knowledge on ergonomics and human factors it gives specific information on concepts and tools unique to ergonomics about 500 entries published in three volumes and on cd rom are pre

from the schools of ancient times to the present day gary thomas explores how and why education has evolved has it has examining education worldwide he explains the way schools work noting how curricula are remarkably consistent around the world delving into some of the big questions thomas explores the history of education in this very short introduction considering various styles such as progressive versus formal he also explores the ideas of some of the big theorists including piaget and vygotsky looking at different forms of education and styles of teaching he considers the ways in which education is being improved by matching styles of learning to teaching and ensuring that schools are more inclusive and meaningful for a broader range of students he finishes by considering the ways in which education may develop over the coming century about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts
