the main purpose of this book is to provide civil engineering students with a clear presentation of the theory of
engineering graphics and the use of autocad 2013 each chapter starts with the chapter objectives followed by
the introduction the contents of each chapter are organized into well defined sections that contain step by step
instructions to carry out the autocad commands the drawings shown in this book are created using autocad
2013 and paint software several improvements are made to the fourth edition the index is improved the
chapter suggested in class activities provides in class activities or ica for some of the initial icas it explains the
drawing with the help of step by step instruction also new problems are added to the homework s chapter
furthermore the contents and the drawings of every chapter are improved each chapter starts with the chapter
objectives followed by the introduction the bulleted objectives provide a general overview of the material
covered the contents of each chapter are organized into well defined sections that contain detailed step by step
instruction with graphical illustrations to carry out the autocad commands this book has been categorized and
ordered into nine parts introduction to autocad 2013 use of autocad in land survey data plotting the use of
autocad in hydrology transportation engineering and autocad autocad and architecture technology introduction
to working drawing suggested drawing problems bibliography index

this paper aims to refer to a subjective approach to a type of complex system human ecosystems referred to as

deontical impure systems dis to capture a set of properties fundamental to the distinction between human and natural ecosystems there are four main phenomenological components directionality intensity connection energy and volume the paper establishes thermodynamics of deontical systems based on the law of zipf and the temperature of information
