students of the bible are generally comfortable with their understanding of the command make disciples matt 28 19 indeed most of them would argue that the gospel writer matthew spells out very clearly the meaning of the term in the great commission matt 28 16 20 by utilizing three key words viz go ing baptizing and teaching this point of view is the result of centuries of scholarly opinion that has looked primarily if not solely to these three adjacent participles of make disciples matt 28 19 and not to the entire gospel of matthew for the meaning of the command this book does not suggest that going baptizing and teaching are not to be considered in determining the essence of christian disciple making rather it contends that the three terms should not be our only source of meaning this problem is tackled herein by demonstrating that matthew establishes a framework within the great commission itself that points to a fuller meaning of make disciples in the broader context of his gospel and that the gospel writer expects his reader to draw on his entire gospel to grasp the full meaning of this important command

in this book leading scholars from every relevant field report on all aspects of compositionality the notion that the meaning of an expression can be derived from its parts understanding how compositionality works is a central element of syntactic and semantic analysis and a challenge for models of cognition it is a key concept in linguistics and philosophy and in the cognitive sciences more generally and is without question

one of the most exciting fields in the study of language and mind the authors of this book report critically on lines of research in different disciplines revealing the connections between them and highlighting current problems and opportunities the force and justification of compositionality have long been contentious first proposed by frege as the notion that the meaning of an expression is generally determined by the meaning and syntax of its components it has since been deployed as a constraint on the relation between theories of syntax and semantics as a means of analysis and more recently as underlying the structures of representational systems such as computer programs and neural architectures the oxford handbook of compositionality explores these and many other dimensions of this challenging field it will appeal to researchers and advanced students in linguistics and philosophy and to everyone concerned with the study of language and cognition including those working in neuroscience computational science and bio informatics

famed critic terry eagleton takes a serious if often amusing look at the meaning of life eagleton first examines how centuries of thinkers and writers from marx and schopenhauer to shakespeare sartre and beckett have responded to the ultimate question of meaning he suggests however that it is only in modern times that the question has become problematic but instead of tackling it head on many of us cope with the feelings of meaninglessness in our lives by filling them with everything from football to fundamentalism he argues instead that the meaning of life is a matter of living in a certain way a certain quality depth abundance and intensity of life
