written by a team from the u s army s combat feeding directorate at the natick research development and engineering center this technical volume represents a comprehensive guide to how the military designs processes customizes packages and distributes highly palatable long shelf life food products for field personnel the book offers new data on numerous technologies used to solve problems such as nutrient densification lightweighting novel thermal processing and long term quality preservation in delivering appetizing foods and more testing techniques are explained for evaluating sensory qualities of foods and their effects on physical and cognitive performance

stop guessing start engineering your profit is your cattle farm running on tantsa tantsa guesswork are you tired of seeing your hard earned money eaten up by expensive commercial feeds and unexplained sickness it s time to stop treating your farm like a lottery ticket and start running it like a factory beefing up the philippines is a practical industrial grade operations manual designed specifically for the filipino smallholder farmer written by engr jowie sindol lopez a farmer s son from mindanao who became a feed mill manager for one of australia s largest feedlots this book bridges the gap between world class engineering efficiency and the resourcefulness

of the filipino spirit what you will learn engineer your feed stop buying expensive sacks learn to identify black gold in your own backyard transforming cheap local by products like darak rice bran sapla copra meal and dayami rice straw into high performance rations using the engineer s pearson square method manage the engine understand the science of the rumen and how to fuel the billions of microbes that actually grow your cow build profit firewalls implement simple low cost biosecurity protocols like the tapakan system that stop disease dead in its tracks master the numbers throw away the guesswork use the kwaderno system to track your feed conversion ratio fcr calculate your true floor price and negotiate with traders like a hardened negosyante scale up transition from a simple fattener to a breeder with industrial insights on genetics artificial insemination and the rolling system for consistent cash flow whether you are an ofw planning your retirement farm a student of agriculture or a cooperative member looking to professionalize your operations this book is your blueprint it contains the exact formulas checklists and management protocols used in industrial feedlots re engineered for the philippine setting the future of philippine agriculture isn t about working harder it s about working smarter it s time to beef up your knowledge beef up your system and beef up the philippines about the author jowie sindol lopez is not just an agricultural and biosystems engineer he is first and foremost a farmer s son from mindanao his earliest memories are of walking barefoot in the rice paddies growing up in a world that ran on the rhythm of planting and harvest he saw firsthand the daily struggle of the smallholder farmer a life of tantsa tantsa guesswork a reliance on swerte luck and the deep frustration of seeing back breaking work trapped in cycles of low profit believing there had to be a more efficient more engineered way he earned his degree in agricultural and biosystems engineering from mindanao state university maguindanao after passing the board exam he spent five years 2009 2014 on the front lines of philippine agriculture he wasn t in an office he was in rice and corn research corn production and on the vast banana and pineapple plantations it was here he saw the great disconnect mountains of waste darak rice bran dayami rice straw sapla copra meal being treated like basura trash while local farmers struggled to find affordable feed in 2014 he took an opportunity to work in australia and work for one of the largest family owned feedlots in the country he started as a general hand shoveling spilled grain cleaning feedbunks and learning the business from the ground up for the last decade he has worked his way up to feed mill manager today he oversees both the feedlot feeding and milling operations a massive system that produces and delivers 650 tons of high performance feed every single day to 50 000 head of cattle in australia he learned the engineer s mindset in action a data driven world class system where nothing is wasted and everything is measured to achieve one goal maximum efficient profit this book is the mission of his life it is the bridge between his two worlds it combines the puso heart and resourcefulness of the filipino farmer with the data driven systems he now manages he wrote this blueprint because he is tired of seeing filipino farmers guess we have the resources we have the work ethic all we are missing is the system this is that system

this volume the result of an ongoing bridge building effort among engineers and humanists addresses a variety of philosophical ethical and policy issues emanating from engineering and technology interwoven through its chapters are two themes often held in tension with one another exploring boundaries and expanding connections expanding connections highlights contributions that look to philosophy for insight into some of the challenges engineers face in working with policy makers lay designers and other members of the public it also speaks to reflections included in this volume on the connections between fact and value reason and emotion engineering practice and the social good and of course between engineering and philosophy exploring boundaries highlights contributions that focus on some type of demarcation public policy sets a boundary between what is regulated from what is not

academic disciplines delimit themselves by their subjects and methods of inquiry and professions approach problems with unique goals and by using concepts and language in particular ways that create potential obstacles to collaboration with other fields these and other forms of boundary setting are also addressed in this volume contributors explore these two themes in a variety of specific contexts including engineering epistemology engineers social responsibilities engineering and public policy making engineering innovation and the affective dimensions of engineering work the book also includes analyses of social and ethical issues with emerging technologies such as 3 d printing and its use in medical applications as well as social robots initial versions of the invited papers included in this book were first presented at the 2014 meeting of the forum on philosophy engineering and technology fpet held at virginia tech in blacksburg virginia usa the volume furthers fpet s intent of extending and developing the philosophy of engineering as an academic field and encouraging conversation promoting a sense of shared enterprise and building community among philosophers and engineers across a diversity of cultural backgrounds and approaches to inquiry
