the new york times bestseller that makes scientific subjects both understandable and fun every sentence sparkles with wit and charm richard dawkins from the pulitzer prize winning new york times science journalist and bestselling author of woman this is a playful passionate guide to the science all around us and inside us from physics to chemistry biology geology astronomy and more drawing on

conversations with hundreds of the world's top scientists natalie angier creates a thoroughly entertaining guide to scientific literacy for those who want a fuller understanding of some of the great issues of our time the canon offers insights on stem cells bird flu evolution and global warming for students or parents whose kids ask a lot of questions about how the world works it brings to life such topics as how the earth was formed or what electricity is also included are clear fascinating explanations of how to think scientifically and grasp the tricky subject of probability the canon is a joyride through the major scientific disciplines that reignites our childhood delight and sense of wonder and along the way tells us what is actually happening when our ice cream melts or our coffee gets cold what our liver cells do when we eat a caramel why the horse is an example of evolution at work and how we're all really made of stardust

at the dawn of the last century leading scientists and politicians giddily predicted that science especially darwinian biology would supply solutions to all the intractable problems of american society from crime to poverty to sexual maladjustment instead politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines in criminal justice these experts denied the existence of free will and proposed replacing punishment with invasive cures such as the lobotomy in welfare they proposed eliminating the poor by sterilizing those deemed biologically unfit in business they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior in sex education they advocated creating a new sexual morality based on normal mammalian behavior without regard to longstanding ethical and religious imperatives based on extensive research with primary sources and archival materials john g west's captivating darwin day in america tells the story of how american public policy has been corrupted by scientific ideology marshaling fascinating anecdotes and damning quotations west's narrative explores the far reaching consequences for society when scientists and politicians deny the essential differences between human beings and the rest of nature it also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong west concludes with a powerful plea for the restoration of democratic accountability in an age of experts

in this fascinating story of evolution religion politics and personalities matthew chapman captures the story behind the headlines in the

debate over god and science in america in kitzmiller v dover board of education decided in late 2005 a republican judge rendered a surprising verdict in a case that pitted the teaching of intelligent design sometimes known as creationism in a lab coat against the teaching of evolution taking place in a small pennsylvania school district the case had national repercussions all the way up to president bush who said he believed intelligent design should be taught as an alternative theory to evolution matthew chapman the great great grandson of charles darwin spent several months covering the trial from beginning to end through his in depth encounters with the participants creationists preachers teachers scientists on both sides of the issue lawyers theologians the judge and the eleven parents who resisted the fundamentalist proponents of intelligent design chapman tells a sometimes terrifying often hilarious and above all moving story of ordinary people doing battle in america over the place of religion and science in modern life written with a filmmaker s eye for character and detail and including insights only a descendent of darwin could bring forth chapman paints an entertaining yet disturbing picture of america today
