excerpt from engineering analysis of a mining share in the following pages i have endeavored to set forth considerations which it seems to me enter logically into the analysis of a mining venture the success of any mining undertaking hinges on the correct application of engineering principles therefore to be comprehensive and accurate the investigation of that undertaking should be approached from an engineering viewpoint i have applied the analysis to a single share since the figures resulting therefrom are more easily handled and more readily comprehended obviously the analysis by shares is equivalent to the analysis of the whole property two technical books of the highest order which were widely read and discussed and which treated on certain phases of the same subjects have preceded this publication they are principles of mining by h c hoover and the cost of mining by j r finlay i tender my acknowledgments to the authors of these admirable works where there is any overlapping of ideas the discussion is on broad lines and is based on observations during
