using variants of a modified version of dornbusch s model of price level and exchange rate dynamics it is demonstrated that satisfaction of the formal condition for existence of a unique non explosive solution of a linear rational expectations model with forward and backward looking dynamic processes equality of the number of stable roots with the number of independent backward looking processes does not guarantee the economic sensibility of this solution even if one accepts the usual arguments for excluding speculative bubbles from the solutions of such models moreover satisfaction of the formal condition for existence of an infinity of non explosive solutions for such rational expectations models more stable roots than independent backward looking processes does not assure that any of these solutions is economically sensible

this book provides a beautifully clear and coherent account of traditional and modern theories of exchange rate determination and the effects of international monetary movements focusing on the links between nominal exchange rate determination and the effects on the real economy

including necessary stabilization policies this text provides a stimulating introduction to international monetary economics exchange rate economics includes a substantial section extending the treatment of internal and external stabilization and adjustment policies to developing countries and transition economies as well as analysing the role of policy in industrialized nations and within monetary unions covering a complete course in international monetary economics the book is written in a clear and concise style suitable for all students exchange rate economics includes a substantial section presenting the latest econometric techniques and results to students

ostler shows that economic conditions alone cannot explain why populism flourished or founded through a study of populism in kansas nebraska and iowa ostler demonstrates that the strength or weakness of the two dominant political parties within a state had a significant effect on the success of a third party challenge
