now in its third edition bioethics in canada a philosophical introduction offers a comprehensive overview of the philosophical historical and medical concepts shaping contemporary debates on biomedical issues the text opens with an introduction to moral theory and bioethical principles followed by application of these theories and principles to real world ethical conflicts involving abortion distributive justice genetics reproductive technology and other vital topics a landmark case opens each chapter illuminating the many issues involved in these debates as well as the philosophical assumptions that shape them thoroughly updated to reflect recent political medical and cultural changes this third edition features new sections on medical assistance in dying maid the moral philosophy of liberalism in bioethics the mad movement crispr and gene editing and expanded content on mental health rural and remote communities and codes of conduct and codes of ethics accessibly written with newly added case studies in the health care workplace this text is an insightful resource for courses in the disciplines of philosophy health studies medicine and nursing providing a strong ethical foundation in an ever changing field

the thoroughly revised and updated third edition of the acclaimed modern epidemiology reflects both the conceptual development of this evolving science and the increasingly focal role that epidemiology plays in dealing with public health and medical problems coauthored by three leading epidemiologists with sixteen additional contributors this third edition is the most comprehensive and cohesive text on the principles and methods of epidemiologic research the book covers a broad range of concepts and methods such as basic measures of disease frequency and associations study design field methods threats to validity and assessing precision it also covers advanced topics in data analysis such as bayesian analysis bias analysis and hierarchical regression chapters examine specific areas of research such as disease surveillance ecologic studies social epidemiology infectious disease epidemiology genetic and molecular epidemiology nutritional epidemiology environmental epidemiology reproductive epidemiology and clinical epidemiology

this issue of neurologic clinics edited by dr david younger is focused on global and domestic public health and neuroepidemiology topics covered in the issue include but are not limited to research methods gene environment interplay alzheimer disease headache disorders multiple sclerosis and related disorders lyme

neuroborreliosis cerebrovascular disease neuro oncology community health needs assessment and neurologic public health in the brics

a now classic text the third edition of this introduction to the field gives an overview of the core concepts that form the underpinnings of epidemiology and epidemiologic research epidemiologic concepts are presented in a coherent and straightforward exposition allowing students to build a strong foundation for understanding the principles of epidemiologic research

strategic health planning the cornerstone of initiatives designed to achieve health improvement goals around the world requires an understanding of the comparative burden of diseases and injuries their corresponding risk factors and the likely effects of intervention options the global burden of disease framework originally published in 1990 has been widely adopted as the preferred method for health accounting and has become the standard to guide the setting of health research priorities this publication sets out an updated assessment of the situation with an analysis of trends observed since 1990 and a chapter on the sensitivity of gbd estimates to various sources of uncertainty in methods and data

contributed seminar papers

what does philosophy have to do with the human voice has contemporary philosophy banished the voice from the field of legitimate investigation timothy gould examines these questions through the philosopher most responsible for formulating them stanley cavell hearing things is the first work to treat systematically the relation between cavell s pervasive authorial voice and his equally powerful though less discernible impulse to produce a set of usable philosophical methods gould argues that a tension between voice and method unites cavell s broad and often perplexing range of interests from wittgenstein to thoreau from shakespeare to the movies and from opera to freud gould reveals the connection between the voice within cavell s writing and the voices cavell appeals to through the methods of ordinary language philosophy within cavell s extraordinary productivity lies a new sense of philosophical method based on elements of the act of reading hearing things is both an important study of cavell s work and a major contribution to the construction of american philosophy

this book offers specific strategies or action guidelines for people who work in human service agencies but also suggest some tactical steps for effectively carrying out these strategies at the same time detailed attention is given to personal client organisational and community factors that bear on a practitioner s attempts to achieve a specific objective with a particular strategy contents a systematic approach to change promoting and innovation changing and organisation s goal fostering participation increasing the effectiveness of role performance conclusion

for as long as they have existed the national parks have been the scene of some of the most intensive commercial activity in the american west selling yellowstone recounts the story of such activities in our oldest park from the 1870s through the 1960s it is the first book to examine critically the role of business in the development of america s national parks demonstrating how profit driven entrepreneurs shaped the physical landscape of what is generally perceived as unaltered wilderness jacket
