mervyn lewis and paul mizen have written a clear and interesting account of both theoretical and practical aspects of money's role in the

economy taking the UK as their starting point they have incorporated international data to illuminate key concepts grounded in theory throughout and including helpful chapter conclusions summarizing the key ideas of each topic area this analysis will allow students worldwide to understand the role of money in the modern economy

examines recent overseas experience and risk management aspects of PPPs with a focus on construction based projects such as roads waste water treatment hospitals and schools

a reassertion of the importance of theology to political action that goes beyond both liberal democratic theory and neoconservatism

networks have a widespread economic significance they structure the way that market traders interact and configure relations within and between social groups urban centres and nation states this work on the economics of networks is suitable for researchers in microeconomics spatial and business economics

the prohibition of interest is the feature of Islamic banking which most distinctly sets it apart from conventional banking to western eyes this seems a strange restriction but Christian countries themselves maintained such a ban for 1400 years Islamic banking asks why Islam has been able to maintain its stand the book explores the intricacies of Islamic law and the religious and ethical principles underpinning Islamic banking it then considers the analytical basis of Islamic banking and financing in the light of modern theories of financial intermediation and identifies the conceptual issues to be overcome following case studies of the operations of Islamic banks in Bahrain Bangladesh Egypt Jordan Malaysia and Australia along with Iran Pakistan and Sudan the volume concludes that many of the criticisms of their activities seem misplaced it argues that the factors governing success are the distinctive system of corporate governance and continued product innovation the book ends by considering four such innovations Islamic investment banking and project finance Islamic insurance Islamic securities and the formation of a pan Islamic international financial centre this pathbreaking volume the first to consider Islamic banking and finance from a global perspective will be of great interest to scholars of money and banking international finance and middle eastern studies

first published in 2007 Routledge is an imprint of Taylor Francis an informa company

focuses upon the historical development of the transaction cost view of the firm it comprises the most influential papers in the field the three volumes address graduate students of business economics

the authors examine the many reasons and theories that exist to explain the growth of the us external deficit and the concerns surrounding its financing particularly the alarming reliance on foreign central bank purchases these and various related issues are analysed in a systematic and rigorous manner

aims to provide a survey of the theoretical foundations of spatial location of firms and industries and to explore the impact of economic integration on this process this book is intended for scholars theorists policymakers and business executives who face these challenges to the economy

aims to provide a survey of the theoretical foundations of spatial location of firms and industries and to explore the impact of economic integration on this process this book is intended for scholars theorists policymakers and business executives who face these challenges to the economy

monetarism is dead central bankers are all wicksellians now they target low inflation rates with no regard to monetary aggregates whatsoever by acting upon short term real rates of interest this is the new consensus in monetary economics or simply the new keynesian synthesis yet this synthesis still hinges on variants of the long run vertical phillips curve originally proposed by milton friedman the father of old line monetarism contributors to the volume question this new consensus while they agree that the money supply should be conceived as endogenous they carefully examine the procedures pursued by central banks the monetary policy transmission mechanisms suggested by central bankers themselves and the assumptions imbedded in the new consensus they propose alternative analyses that clearly demonstrate the limits of modern central banking and point to the possible instability of monetary economies heterodox and orthodox monetary macroeconomists alike will find this illuminating book of great interest

professor sigman has selected the most authoritative previously published papers for this pathbreaking collection this timely book examines private decision making and government policy for the management of hazardous waste the clean up of contaminated land and the redevelopment of brownfield sites issues explored include the success of economic incentive policies such as green taxes and

tort liability environmental decentralization and attitudes toward risk by both regulators and households the additional focus on empirical analysis will help economists understand this challenging public policy area and will make economic insights accessible to policymakers
