monocultures of the mind biodiversity a third perspective biodiversity and the environment the seed and spinning wheel technology development and biodiversity conservation the biodiversity convention an evaluation from the third world perspective

this book presents a legal genealogy of biodiversity of its strategic use before and after the adoption of the convention on biological diversity 1993 this history of genetic gold details how with the aid of international law the idea of biodiversity has been instrumentalized towards political and economic aims a study of the strategic utility of biodiversity rather than the utility of its protection under international law the book's focus is not therefore on the sustainable or non sustainable use of biodiversity as a natural resource but rather on its historical use as an intellectual resource although biodiversity is still not being effectively conserved nor sustainably used the convention on biological diversity and its parent regime persists now after several decades of operation this book provides the comprehensive answer to the question of the convention's continued existence drawing from environmental history the philosophy of science political economy and development studies this book will be of interest to

advanced undergraduate and postgraduate students in environmental law international law environmental studies and ecology

one of the cornerstones of life's wonders is the vast array of species filling the planet from plants to animals to humans there is no shortage of beings to provide spice of life variety is said to be periodically scientists announce the discovery of a new form of life so it seems as if earth is capable of producing new species just to keep us on our toes at times the immense breadth of living things can even feel overwhelming as one pauses to ponder how numerically insignificant humans are when compared to the insect population given the biological diversity of the planet it is incumbent upon humans to safeguard the natural beauty of the environment to that end conservation takes on special importance necessitating the balancing of industrial expansion with preserving the flora and fauna surrounding us this book is an important tool in understanding and researching the many different life forms spanning the globe collected here is a substantial and carefully selected listing of relevant literature on biological diversity and its conservation following this bibliography are author title and subject indexes to allow for further access to this information the sheer bulk of the works about biological diversity can be so intimidating that a book such as this one becomes useful in sorting through the resources about the importance of life's variety

in the 1990s the international community placed both biodiversity protection and trade liberalization high on its agenda resulting in the formation of global agreements and institutions such as the 1992 convention on biological diversity cbd and the world trade organization wto distinct in character they are increasingly linked through the many ways that trade rules affect biodiversity developing separately and involving very different communities there is a risk that the rules and policies of one regime could hinder the effectiveness of the other this publication seeks to encourage sustainable development by examining and building upon the complementary aspects of these two international regimes it describes specific proposals for resolving or avoiding conflicts and for promoting synergies including opportunities to support effective implementation of the trade related aspects of the cbd intended as background for both trade and environment experts and officials as well as for environment and development non governmental organizations

organic food and farming a reference handbook is a valuable resource for students and general readers curious about the history evolution and growth of the organic food movement organic food and farming a reference handbook begins with a deep dive into the origins of organic farming offering a clear discussion of what constitutes organic production and how that has changed over time next the volume provides a comprehensive overview of growth of organics as both an industry and a social movement and the inherent challenges that occur from trying to be both the book additionally covers controversial issues and challenges along with good news about what is working and what is possible included are essays by scholars farmers and experts working with ngos as well as profiles of key people and organizations in the organic sector additional chapters include data and documents a comprehensive resource list and a detailed chronology of the key events in the history of the organic sector distinguishing it from others that laud or dismiss organic food and farming practices is this book's objective nature which allows it to be used as a definitive resource on the topic

weaving together philosophical historical legal scientific and personal viewpoints this book gives a rich sample of the vast web which makes up our cultural spiritual and social diversity the volume highlights the central importance of cultural and spiritual values in the appreciation and preservation of all life and argues that these values give us a true reflection of worth it demonstrates how many cultures see nature as an extension of society and how sensitive stewardship is an integral part of existence the book covers language and how cognition and speech encode indigenous knowledge systems are critical for preservation of diversity the complex issue of indigenous people and the problems of preserving their relationships both with and within their societies voices of the world expressions of concern and disquiet over the declining world diversity holistic health practices where environment and diet are integrated into indigenous medical health systems the importance of developing effective intellectual property rights and territorial and land rights to enhance and maintain local control this book arose out of the global biodiversity assessment gba a massive review of current knowledge in the broad field of biological diversity commissioned by united nations environmental programme unep

this is a collection of essays on jharkhand that deals with the general theme of environment and development as also a variety of specific issues as forest policies and practices environmental protection and conservation forest management gender question and displacement

over the last few decades various international and cross cultural partnerships have been established often with impressive speed to facilitate the protection of natural resources and the environment however many problems exist within these partnerships international declarations and conventions are not binding in the same ways as national laws the motivations behind the involvement of a country or culture are not always easy to identify and are often understood differently in different places environmental obligations are often interpreted and implemented differently in different places and common aims are often not mutual at all these difficulties surrounding the establishment and implementation of workable international and cross cultural environmental policies form the basis of this book

science librarian smith western kentucky u cites literature both on the biological study of diversity itself and on the socio natural science of diversity conservation the main part lists over 5 700 monographs and articles and the second identifies a selection of over 100 special issues of serial publications in which the main theme is related to biodiversity studies the entries include ratings of the number of citations the work has received in the literature and key words the indexes are by general subject geography and organism annotation copyrighted by book news inc portland or
