art and science they may seem like opposites but throughout history there have been visionaries who have brought together these contrasting subjects the art of science explores the work of 40 such artists and artist scientists uncovering how these innovators have designed futuristic technology centuries ahead of its time investigated time and space through abstract art and created sculpture informed by nasa technology an expertly curated selection of artists from many different cultures and eras including huang quan leonardo da vinci johannes vermeer anna atkins olafur eliasson and anicka yi this book tells the story of the vital partnership between art and science with over 200 lavish illustrations

is science the new art scientists weave incredible stories invent wild hypotheses and ask difficult questions about the meaning of life they have insights into the workings of our bodies and minds which challenge the myths we make about our identities and selves they create visual images models and scenarios that are gruesome baffling or beguiling they say and do things that are ethically and politically shocking contemporary scientists frequently talk about beauty and elegance artists hardly ever do while demonstrating how science is affecting the creation and interpretation of contemporary art this book proposes that artistic insights are as important on their own terms as those in science and that we can and should accommodate both forms of knowledge featuring the work of artists such as damien hirst christine borland bill viola and helen chadwick and art science collaborative ventures involving dorothy cross eduardo kac and stelarc it looks at the way new scientific explanations for the nature of human consciousness can influence our interpretation of art at the squeamish interventions being produced by artists relishing in new technologies and at art which takes on the dangers facing the fragile environment seeing the world from the other point of view can inform the practice of both sides this book will provide new insights to artists scientists and the wider public

a celebration of the relationship between art and science through the lense of 40 artists and artist scientists

seminar paper from the year 2012 in the subject philosophy miscellaneous grade 9 maastricht university language english abstract in the history of art ernst gombrich s groundbreaking art and illusion a study in the psychology of pictorial representation 1960 was influential in arguing against the traditional view of representation of reality in art as imitation in the philosophy of science notably karl popper and then thomas kuhn challenged the concept of progress as the cumulation of factual observations this paper wants to approach the larger issue of progress within the framework of art and illusion by asking in how far do concepts of progress as derived from the philosophy of science relate to the notion of arts more specifically how did gombrich challenge the traditional idea of representation as imitation in following it will be shown that gombrich s methodology and main concepts are greatly indebted to popper s theory of falsification in a second step thomas kuhn s theory of scientific revolution which opposes popper s writings will be outlined in relation to gombrich and his ideas of perception and classification

einstein once remarked after a certain high level of technical skill is achieved science and art tend to coalesce in aesthetics plasticity and form the greatest scientists are always artists as well in this volume some of the world s leading thinkers come together to expound on the interrelations between sciences and arts while one can segregate art and place it outside the scientific realm it is nevertheless inextricably linked to our essential cognitive emotional perceptual modalities and abilities and therefore lies alongside and in close contact with the

method of science and philosophy what inspiration can scientists draw from art and how can scientific spirit foster our understanding and creation of aesthetic works how are art and science grounded in our cognition what role does perception play in science and art are criteria for beauty in art and science the same how does evolution shape our understanding of art how do science art and scientifico artistic frameworks shape society as a whole and help us address its pressing issues the epistemological and ontological aspects haunt artists philosophers and scientists alike the essays in this volume address these manifold questions while also elucidating the pragmatic role they play in our daily life

sumptuously illustrated with dazzling objects this publication explores the ways art and science worked hand in hand in the middle ages and renaissance through the manipulation of materials such as gold crystal and glass medieval artists created dazzling light filled environments evoking in the everyday world the layered realms of the divine while contemporary society separates science and spirituality the medieval world harnessed the science of light to better perceive and understand the sacred from 800 to 1600 the study of astronomy geometry and optics emerged as a framework that was utilized by theologians and artists to comprehend both the sacred realm and the natural world through essays written by contributors from the fields of art history the history of science and neuroscience and with more than two hundred illustrations including glimmering golden reliquaries illuminated manuscripts rock crystal vessels astronomical instruments and more lumen cuts across religious political and geographic boundaries to reveal the ways medieval christian jewish and islamic artists theologians and thinkers studied light to convey the sense of wonder created by moving light on precious materials a number of contemporary artworks are placed in dialogue with historic objects

why science needs art explores the complex relationship between these seemingly polarised fields reflecting on a time when art and science were considered inseparable and symbiotic pursuits the book discusses how they have historically informed and influenced each other before considering how public perception of the relationship between these disciplines has fundamentally changed science and art have something very important in common they both seek to reduce something infinitely complex to something simpler using examples from diverse areas including microscopy brain injury classical art and data visualization the book delves into the history of the intersection of these two disciplines before considering current tensions between the fields the emerging field of neuroaesthetics and its attempts to scientifically understand what humans find beautiful is also explored suggesting ways in which the relationship between art and science may return to a more co operative state in the future why science needs art provides an essential insight into the relationship between art and science in an appealing and relevant way featuring colorful examples throughout the book will be of interest to students and researchers of neuroaesthetics and visual perception as well as all those wanting to discover more about the complex and exciting intersection of

art and science
