excerpt from a text book of nursing for the use of training schools families and private students this book first introduced to the public by my ever to be remembered friend prof edward l youmans to whose most kind encouragement and assistance it owed its existence is now for the second time revised and brought up to date under the supervision of his niece dr alice c youmans it

follows the same practical lines as the earlier editions and until something more comprehensive is offered i trust will continue to be of use to nurses both amateur and professional primarily designed for the latter class i assume that elementary acquaintance with anatomy and physiology which is now of course a fundamental part of their training the fragments of these here introduced serving for them merely the purpose of review may perhaps render the context more intelligible to the untrained majority whom also i hope to help to the whole nursing sisterhood i present it in memory of the days when i was one of them adding a reminder that they never are alone who are accompanied by noble thoughts about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

the guidelines and skills required to become a nurse are always changing and it can be difficult to stay up to date with the current standards this book has been specifically designed to address the main skills you need to meet nmc requirements becoming a nurse will demystify what you need to know while preparing you to meet nmc standards and become a confident practicing professional this book is ideal for both pre registration and practicing nurses it is an excellent resource to prepare you for your programme or to refresh your knowledge of current nmc standards user friendly language describes the key nmc standards to become a nurse personal and professional development professional and ethical practice care delivery care management 17 overarching standards of the nmc more readable than texts on single topics such as ethics or management it is also a better preparation for the accountability of registration than clinically oriented books usually are would you recommend it resoundingly yes sue mcbean university of ulster thes feb 2010

It's your complete guide to nursing from basic concepts to essential skills. Fundamentals of nursing 9th edition prepares you to succeed as a nurse by providing a solid foundation in critical thinking, evidence based practice, nursing theory, and safe clinical care in all settings. With illustrated step by step guidelines, this book makes it easy to learn important skills and procedures. Care plans are presented within a nursing process framework, and case studies show how to apply concepts to nursing practice from an expert author team led by Patricia Potter and Anne Griffin Perry. This bestselling nursing textbook helps you develop the understanding and clinical reasoning you need to provide excellent patient care. 51 skills demonstrations provide illustrated step by step instructions for safe nursing care and include rationales for each step. 29 procedural guidelines provide streamlined step by step instructions for performing basic skills. Unique critical thinking models in each clinical chapter show how to apply the nursing process and critical thinking to achieve successful clinical outcomes. Evidence based practice chapter shows how nursing research helps in determining best practices. Unique caring for the cancer survivor chapter prepares nurses to care for cancer patients who may still face physical and emotional issues. Case studies include unique clinical application questions and exercises allowing you to practice using care plans and concept maps. The 5 step nursing process provides a consistent framework for care and is demonstrated in more than 20 care plans. 15 review questions in every chapter test your retention of key concepts with answers available in the book and on the Evolve companion website. Practical study tools on Evolve include video clips of skills, skills checklists, printable key points, a fluid electrolytes tutorial, a concept map creator, an audio glossary, and more. Unique, clear, streamlined writing style makes complex material more approachable. More than 20 concept maps show care planning for clients with multiple nursing diagnoses. Key points and key terms in each chapter summarize important content for more efficient review and study. Unexpected outcomes and related interventions for each skill alert you to potential problems and appropriate nursing actions. Delegation coverage clarifies which tasks can and cannot be delegated. A glossary provides quick access to definitions for all key terms.

this book serves as a textbook for undergraduate and postgraduate nursing students it is well structured concise and comprehensive with a student friendly and innovative approach main text facilitates easy grasp of the complex concept each chapter begins with chapter outline for a quick overview well supplemented with illustrations tables and boxes for better understanding of the concept incorporates application level questions and updated information assess yourself section at the end of every chapter for self evaluation sample sheets of planning hierarchy organizational charts budget master plans staffing estimation performance appraisal and in service training are included

published at a time when the discipline of professional nursing was still comparatively new this book did not merely give information and lay down rules but provided a systematic training guide on school work taking into account the needs and difficulties of nursing together with the experience of the working teacher
