an instinct is the mechanism by which animals and humans can perform complex behaviour patterns without learning or conscious effort  
instinctive behaviours are inherited and have evolved to be adaptive fitting the organism to its particular role  
instinct is of particular importance in animal behaviours such as courtship mating and other reproductive activities  
more general behaviours such as feeding and defence may have an instinctive base  
many birds some grasshoppers frogs and a number of other animals have song or call patterns that attract mates and are based upon instinct  
instinctive behaviours often require a stimulus or releaser to initiate them  
the herring gull chick pecks the red spot on the adult's bill releasing its instinctive feeding behaviour  
a releaser will operate only if conditions both internal and external to the organism are suitable

this book examines freud s changing views of human instincts exploring the moral and social implications part one investigates freud s concept of instinct and discusses the phases of his ongoing attempt to classify the instincts in part two the author argues that freud s instinct theory leads to a moral philosophy and he relates this philosophy to freud s views on group psychology the notion of instinct is central to psychoanalytic theory but never before has it been treated so comprehensively with such close attention to the text nor has anyone previously examined in detail the moral and social implications of freud s instinct theory in examining these implications abel bridges the fields of psychology and philosophy
