mr johnson s thesis can be summarized without much difficulty after generations of extravagant and reckless industrial expansion we are clearly entering an age of economic scarcity while human demands continue to rise natural resources especially the non renewable kind become harder to find and more expensive to extract process transport and distribute this simple brute fact is the basic cause of inflation despite the inability of most professional economists to see it the dismal science has never been more dismally obtuse than it is today the law of diminishing returns is coming into effect technological developments can delay the process but not halt or reverse it nor can we rely on government or big business to save us planning for further growth delays the adjustments that must be made makes a fair sharing of necessary sacrifices more troublesome and if carried too far will make more severe and painful because rapid the inevitable decline of the international economic machine the best way to deal with the end of affluence is to accept it not fight it and to begin here and now the unavoidable adaptations on an individual family and

community basis piecemeal experimental and muddling

in response to the coming impact of peak oil john michael greer helps us envision the transition from an industrial society to a sustainable ecotechnic world not returning to the past but creating a society that supports relatively advanced technology on a sustainable resource base fusing human ecology and history this book challenges assumptions held by mainstream and alternative thinkers about the evolution of human societies human societies like ecosystems evolve in complex and unpredictable ways making it futile to try to impose rigid ideological forms on the patterns of evolutionary change instead social change must explore many pathways over which we have no control the troubling and exhilarating prospect of an open ended future he proposes requires dissensus a deliberate acceptance of radical diversity that widens the range of potential approaches to infinity written in three parts the book places the present crisis of the industrial world in its historical and ecological context in part one part two explores the toolkit for ecotechnic age and part three opens a door to the complexity of future visions for anyone concerned about peak oil and the future of the industrial society this book provides a solid analysis of how we got to where we are and a practical toolkit to prepare for the future

not an essay in normative political philosophy but a discussion of the present day developments in american political thought as they focus on community fowler political science u of wisconsin tells the story of the coming of age of community in the thought of american political intellectuals and provides measured analysis and reflection on some of the directions in which thinking about community has proceeded annotation copyrighted by book news inc portland or

this is the book that supplements money it s not just for rich people here is the description of the method used by my family that saved us thousands of dollars a year on our food bill this workbook has forms at the back so you can create your own price book

in november 2010 republican scott walker was elected governor of wisconsin in something of a tea party sweep the iconic russ feingold lost his seat in the u s senate and the wisconsin legislature became republican in both chambers in early 2011 governor walker announced a budget repair bill that among other things gutted collective bargaining rights for most public sector unions outraged citizens occupied the state capitol for weeks in an outpouring of opposition the likes of which had not been seen in wisconsin since the protests against the war in vietnam in the 1960s various recall elections were held in the summer of 2011 all in regard to the state senate with another set of elections in june 2012 among them the governor s recall was paramount democrats regained control of the senate but scott walker defeated milwaukee mayor tom barrett and kept the governor s mansion many democrats were stunned by the failed recall these essays probe that failure every contributor has a unique perspective but lurking near the core of that probing are two key issues the extent to which corporations have taken over government and whether ecological crises are revealing conventional politics as complicit in disaster

the making of federal coal policy provides a unique record of as well as important future perspectives on one of the most significant ideological conflicts in national policymaking in the last decade the management of federally owned coal almost one third of the u s s total coal resources has furnished an arena for the contest between energy development and environmental protection as well as between the federal government and the states robert h nelson has written an important historical document and a useful guide for policy analysts

readings that point the way to a peaceful democratic and ecologically resilient transition to an era of localization limits and societal opportunities energy supplies are tightening persistent pollutants are accumulating food security is declining there is no going back to the days of reckless consumption but there is a possibility already being realized in communities across north america and around the world of localizing of living well as we learn to live well within immutable constraints this book maps the transition to a more localized world society is shifting from the centrifugal forces of globalization cheap and abundant raw materials and energy intensive commercialization concentrated economic and political power to the centripetal forces of localization distributed authority and leadership sustainable use of nearby natural resources community self reliance and cohesion with crucial regional national and international dimensions this collection offering classic texts by such writers as wendell berry m king hubbert and ernst f schumacher as well as new work by authors including karen litfin and david hess shows how localization a process of affirmative social change can enable psychologically meaningful and fulfilling lives while promoting ecological and social sustainability topics range from energy dynamics to philosophies of limits from the governance of place based communities to the discovery of positive personal engagement together they point the way to a transition that can be peaceful democratic just and environmentally resilient

first published in 1988 a dictionary of green ideas collects together the concepts which go to make up a green view of the world ecology and the environment conservation and appropriate technology politics and philosophy peace and health spirituality and world development all these areas and more are reflected in nearly 1500 entries the entries range from the very short to full length essays reflecting the diversity of the subject matter all give a clear definition of the meaning of the term and an indication of its etymology and earliest use but the dictionary of green ideas is much more than simply a list of definitions the concepts discussed are elaborated upon interpreted set in context exemplified by quotations from a wide range of sources and related to other entries by means of an extensive network of cross references the result is a fascinating and immensely readable book which successfully fulfils a double role as an accessible introduction to green thought and as a source of reference offering new insights to green thinkers of long standing

a conservation easement is a legal agreement between a property owner and a conservation organization generally a private nonprofit land trust that restricts the type and amount of development that can be undertaken on that property conservation easements protect land for future generations while allowing owners to retain

property rights at the same time providing them with significant tax benefits conservation easements are among the fastest growing methods of land preservation in the united states today protecting the land provides a thoughtful examination of land trusts and how they function and a comprehensive look at the past and future of conservation easements the book provides a geographical and historical overview of the role of conservation easements analyzes relevant legislation and its role in achieving community conservation goals examines innovative ways in which conservation easements have been used around the country considers the links between social and economic values and land conservation contributors including noted tax attorney and land preservation expert stephen small colorado s leading land preservation attorney bill silberstein and maine coast heritage trust s general counsel karin marchetti describe and analyze the present status of easement law sharing their unique perspectives experts including author and professor of geography jack wright dennis collins of the wildlands conservancy and chuck roe of the conservation trust of north carolina offer case studies that demonstrate the flexibility and diversity of conservation easements protecting the land offers a valuable overview of the history and use of conservation easements and the evolution of easement enabling legislation for professionals and citizens working with local and national land trusts legal advisors planners public officials natural resource managers policymakers and students of planning and conservation
