the goal of this open access book is to develop an approach to clinical health care ethics that is more accessible to and usable by health professionals than the now dominant approaches that focus for example on the application of ethical principles the book elaborates the view that health professionals have the emotional and intellectual resources to discuss and address ethical issues in clinical health care without needing to rely on the expertise of bioethicists the early chapters review the history of bioethics and explain how academics from outside health care came to dominate the field of health care ethics both in professional schools and in clinical health care the middle chapters elaborate a series of concepts drawn from philosophy and the social sciences that set the stage for developing a framework that builds upon the individual moral experience of health professionals that explains the discontinuities between the demands of bioethics and the experience and perceptions of health professionals and that enables the articulation of a full theory of clinical ethics with clinicians themselves as the foundation against that background the first of three chapters on professional education presents a general framework for teaching clinical ethics the second discusses how to integrate ethics into formal health care curricula and the third addresses the opportunities for teaching available in clinical settings the final chapter empowering clinicians brings together the various dimensions of the argument and anticipates potential questions about the framework developed in earlier chapters

this is a rare compilation of clinically focused chapters on the practice of oncology in more than 25 countries and areas around the world that experience ongoing or intensifying ethnic religious and nationalistic conflict each chapter is written by an internationally respected local physician or nurse topics include the relationship between local culture and the local practice of mainstream modern medicine critical clinical issues faced by local physicians and options for when and how to incorporate palliative care the book ends with chapters on the united states current initiatives on promoting cancer care training in these regions and another on clinical concepts for western clinicians undertaking oncology practice in emerging countries the audience includes oncologists around the world those practicing medicine in similarly extreme circumstances western oncologists organizing or preparing for medical missions and western oncologists who wish to learn from the experiences of oncologists who practice under radically different conditions

in psychiatry as in all of medicine clinicians are frequently involved in training students and residents yet few have themselves been trained in pedagogy improving the quality of psychiatric education should both improve the quality of psychiatric care and make the profession more attractive to medical students written by a team of international experts with many years of experience this comprehensive text takes a globally relevant perspective on providing practical instruction and advice on all aspects of teaching psychiatry it covers learning from undergraduate and postgraduate level to primary medical and community settings enabling readers to find solutions to the problems they are facing and become aware of potential issues which they can anticipate and be prepared to address the book discusses curriculum development using examples from around the world in order to provide trainees with the basic attitudes knowledge and skills they require to practise psychiatry features instruction on developing a curriculum for residency training teaching interviewing skills teaching psychotherapy and using new technology innovative ways of engaging medical students in psychiatry and developing their interest in the specialty including experience with new types of elective and research options and development of roles for students in patient care focuses throughout on how to teach rather than what to teach includes descriptions of workplace based assessments discussions of both theoretical and practical perspectives and examples of particular innovations in the field using case studies presented in a thoroughly readable and accessible manner this book is a primary resource for all clinicians
