clinical cases in critical care in clinical cases in critical care the authors explore core clinical topics and basic sciences in a practical and realistic way and include comprehensive discussions focusing on critically unwell patients with a variety of presentations and underlying disorders including covid 19 hypotension stroke and drug overdose each case begins with a clinical vignette which generates a series of questions the reader must address cases are expanded to discuss differential diagnoses investigations and management issues further questions direct the reader to explore relevant clinical and scientific knowledge similar to the structure of many professional oral examinations the final section of the book consists of exam style questions in a multiple choice and single best answer style perfect for medical practitioners working in critical care settings clinical cases in critical care provides a thorough and accessible reference for trainee physicians with an interest in critical and emergency care as well as allied health professionals in the field this engaging textbook will be an essential companion for anyone getting to grips with the foundation of specialist knowledge required by professionals working in intensive care medicine

this book identifies trends in critical care medicine that will form the basis for practice over the next ten years predicting the future is always risky nevertheless the ideas articulated in this book are likely to serve as a road map for intensivists hospital administrators and governmental leaders interested in healthcare as they seek to improve the quality and efficiency of hospital based services

intensive care patients are the most critically ill in any hospital and they are a patient group that utilises a disproportionate amount of medical resources intensive care medicine around for about 40 years is a relatively recent but globally expanding specialty due to a growing geriatric population of discerning demand for health system the older generation of intensivists are approaching retirement the middle generation is trained in various medical specialties and then subspecialised in intensive care these doctors now lead the way in clinical practice research management and training on the other hand the younger generation of intensivists includes an ever increasing number of doctors who for the first time enjoy a structured training program with clinical rotations courses and exam qualifications written by outstanding specialist practitioners who are also internationally acclaimed authors from the uk and north america this is an authoritative guide to practical intensive care medicine the clinical contents of the book share a practical and educational common thread with each chapter addressing pertinent clinical challenges comprehensively this invaluable book is specially targeted at medical students trainees in intensive care medicine and other acute specialties consultants wishing to remain up to date on all branches of this vast specialty and other allied professionals practicing in intensive care including nurses and physiotherapists

this volume is published under the auspices of the world federation of societies of intensive care medicine which consists of 48 members societies both medical and nursing a truly world wide organisation and whose aim is to promote excellence in the care of critically ill patients the volume will be distributed to delegates on occasion of the 9th international congress of the world federation of societies of intensive and critical care medicine to be held in buenos aires at the end of august 2005

this book part of the european society of intensive care medicine textbook series provides detailed up to date information on the physical cognitive and psychological impairments that are frequently present following a stay in an intensive care unit and examines in depth the available preventive and therapeutic strategies including adapted rehabilitation programs beyond acquainting readers with the multiple facets of post intensive care syndrome pics the book aims to promote the effective follow up of patients thereby enhancing their ability to work and their functional autonomy and to identify risk factors for the development of pics as a stimulus to beneficial organizational changes in intensive care departments the background to the book is the realization by healthcare providers that the quality of life of patients who have required a stay in an intensive care unit can be severely impaired or even become unacceptable all too often the diverse sequelae are overlooked by specialists of other disciplines moreover families and caregivers are also at high risk of post traumatic stress disorder and depression the european society of intensive care medicine has developed the lessons from the icu series with the vision of providing focused and state of the art overviews of central topics in intensive care and optimal resources for clinicians working in intensive care this book written by renowned experts in the field will facilitate the transmission of key knowledge with significant clinical and financial benefits

intensive care in childhood is a relatively new field of medicine due to major differences in physiology many disciplines are involved in the care of the critically ill child apart from specific disease patterns morbidity in direct relation to the stay in the icu or the underlying disease mainly determine long term morbidity today we understand that the treatment of the critically ill child can have a great impact on the quality of life in adulthood this book covers the whole spectrum of intensive care in childhood it is based on the experience of leading specialists from the various fields involved in the treatment of these children

from the viewpoint of a health economist the intensive care unit leu is a particularly fascinating phenomenon it is the epitome of high tech medicine and frequently portrayed as the place where life saving miracles are routinely wrought but the popular imagination is also caught up in the darker side when agonizing decisions have to be made to avoid futile and inhuman continuation of expensive treatments my analytical interests led me to approach these issues by asking what the evidence

tells us about which leu activities are very bene ficial in relationship to their costs and which are not this quickly translates into a slightly different question namely which patients are most appropriately treated in an leu and which not unfortunately it is very hard to answer these questions because it has proved very difficult to investigate these issues in the manner which is now regarded as the gold standard namely by conducting randomized clinical trials or alternative courses of action i think this is a pity and i am not at all convinced that it would be unethical to do so in many cases because there is wide variation in practice and genuine doubt as to which practices are best the two conditions that need to be fulfilled before such a trial is justifiable

critical care mcqs is the perfect companion for anyone sitting exams in intensive care as a training resource or just wanting to improve their knowledge in this constantly developing area of medical practice written by critical care doctors with experience of uk and european examination formats this book leads the reader through 450 true false questions with referenced explanations covering core syllabus topics and key influential papers to date a detailed list of further resources and recommendations relevant to critical care revision is also provided to enable readers to further their knowledge and understanding it is hoped that this book will prove invaluable for preparation and success in upcoming intensive care exams for both candidates and trainers this book would be useful for not only candidates sitting the uk final fellowship of intensive care medicine fficm and european diploma of intensive care edic exams but also the indian diploma in critical care medicine idccm the diploma of the irish board of intensive care medicine dibicm the australia and new zealand fellowship of the college of intensive care medicine cicc american board and any other country related intensive care exams

revision notes in intensive care medicine is a key resource for candidates preparing for postgraduate intensive care examinations mapped to the fficm edic and fcicm syllabuses this title ensures candidates have all the information needed to prepare for their examinations information is presented in concise note form and bullet points with visually memorable tools such as tables and diagrams making revising and retaining key facts easier chapters are arranged into physiological systems such as respiratory intensive care and obstetric intensive care and are subdivided into major clinical issues within each chapter so specific areas of further study can be found easily drawing from the authors experiences as successful candidates and carefully reviewed by consultants revision notes in intensive care medicine provides the foundation for postgraduate intensive care exam revision

one of the first comprehensive summaries of the latest thinking and research in improving intensive care quality and patient safety

for many years intensive care has focused on avoiding immediate death from acute life threatening conditions however there are increasing reports of a number of lingering consequences for those who do indeed survive intensive care examples include on going high risk of death neurocognitive defects significant caregiver burden and continued high healthcare costs surviving intensive care written by the world's experts in this area is dedicated to better understanding the consequences of surviving intensive care and is intended to provide a synopsis of the current knowledge and a stimulus for future research and improved care of the critically ill

a problem oriented aide for the student or resident interested in a career in primary care medicine this volume presents problems and textbook solutions to real life clinical scenarios which are likely to present themselves to the primary care physician in his/her routine practice the authors aim to prepare the trainee for clinical exams as well as for the management of commonly occurring problems in practice the trainee for the post graduate fellowship examinations which include an intensive care component presenting problems and solutions to key clinical scenarios occurring in intensive care

advanced practice in critical care provides experienced critical care nurses with a clear and distinct evidence base for contemporary critical care practice central to the book is the application of research and evidence to practice and therefore case studies and

key critical care clinical situations are used throughout to guide the reader through the patient care trajectory each chapter introduces an initial patient scenario and as the chapter progresses the patient scenario develops with the theoretical perspectives and application in this way it is evident how multi organ dysfunction develops impacting upon and influencing other body systems demonstrating the multi organ impact that is often experienced by the critically ill patient in this way consequences of critical illness such as acute renal failure haemostatic failure and liver dysfunction are explored throughout the text key research findings and critical care treatment strategies are referred to applied and evaluated in the context of the given patient case study advanced assessment techniques are explained and the underlying pathophysiology is discussed in depth advanced practice in critical care is an essential resource for experienced practitioners within critical care whom primarily care for patients requiring high dependency or intensive care
