explores the breadth diversity and significance of the commercial music trade and its communities across Britain during the late seventeenth and eighteenth centuries adding to the existing scholarship on music publishers and instrument makers mostly based in London and the university cities the collection challenges this historiography by offering the first collective narrative for the commercial trade in musical goods and services including the printing publishing and sale of printed music the sale of manuscript music musical instruments and related wares and the tuning and general maintenance of musical instruments such as organs and pianos contributions draw on evidence from

across the country of the trade's activities, networks and communities and recognize the significance of small cities, market towns and regional hubs in cultural dissemination. The music trade in regional Britain therefore contributes to a growing body of work offering a nationwide account of musical culture. It foregrounds a trade that was far more geographically dispersed, economically significant and culturally broad than has previously been acknowledged. Contributors: Stephanie Carter, Simon D. I. Fleming, David Griffiths, Nancy A. Mace, Martin Perkins, Christopher Roberts, Roz Southey, Matthew Spring, Robert Thompson.

In contrast to today's music industry whose principal products are recorded songs sold to customers round the world, the music trade in Georgian England was based upon London firms that published and sold printed music and manufactured and sold instruments on which this music could be played. The destruction of business records and other primary sources has hampered investigation of this trade, but recent research into legal proceedings, apprenticeship registers, surviving correspondence and other archived documentation has enabled aspects of its workings to be reconstructed. The first part of the book deals with Longman, Broderip, arguably the foremost English music seller in the late eighteenth century and the firm's two successors, Broderip, Wilkinson and Muzio Clementi's variously styled partnerships who carried on after Longman, Broderip's assets were divided in 1798. The next part shows how a rival music seller, John Bland and his successors used textual and thematic catalogues to advertise their publications. This is followed by a comprehensive review of the development of musical copyright in this period, a report of efforts by a leading inventor, Charles 3rd Earl Stanhope to transform the ways in which music was printed and recorded and a study of Georg Jacob Vollweiler's endeavour to introduce music lithography into England. The book should appeal not only to music historians but also to readers interested in English business history, publishing history and legal history between 1714 and 1830.

The new eighth edition of the Music Business Handbook and Career Guide maintains the tradition of this classic text as the most comprehensive up-to-date guide to the 100 billion music industry. More than 100,000 students and professionals have turned to earlier editions of the Baskerville Handbook to understand the art, profession and business of music. Thoroughly revised, the eighth edition includes complete coverage of all aspects of the music industry, including songwriting, publishing, copyright, licensing, artist management, promotion, retailing, media and much more. There is a complete section on careers in music, including specific advice on getting started in the music business. Generously illustrated with tables and photographs, the guide also contains a complete appendix with sample copyright forms, writing and publishing agreements, directories of professional organizations and a comprehensive glossary and index. The

eighth edition has been completely updated with particular emphasis on online music and its impact on the rest of the industry

live music events are synonymous with fun but seldom associated with international trade. This book serves to transform this mindset through describing the economic value of live music and analysing the factors affecting international trade in Caribbean live music services. Race and ethnicity, unachieved regionalism within the Caribbean and perceived biases in international trade agreements are assessed in relation to their impact on this trade. Several topics presented in this book are based on empirical findings from a previous microeconomic study dedicated entirely to international trade in live music. Moreover, this book is unique because it compares the Caribbean and South Korea to assess the effectiveness of strategies aimed at developing international trade in live music services. This comparison should inspire robust policy initiatives for advancing international trade in Caribbean live music given that South Korea is presently a heavyweight in the export of its entertainment services despite language barriers. Given the interdisciplinary nature of this book, it will appeal to a wide range of readers such as postgraduate students or researchers of microeconomics, intraregional trade, international trade, international business, international relations, public policy and cultural studies, as well as IP/legal professionals, live music stakeholders, cultural practitioners and policymakers.
