this major new text critically assesses the key political ideologies of the 20th century the 1970s and 1980s witnessed a flowering of new and popular ideologies such as feminism and ecologism and a revival of others notably liberalism the upheavals of the early 1990s have initiated fresh debate amongst major thinkers on the nature of ideology much of it however hostile or polemical modern political ideologies examines in an objective scholarly manner the evolution of key political ideologies and assesses their impact and development during the 20th century this volume is essential reading for all students of politics and indeed anyone who has an interest in current events and wishes to acquire a deeper understanding of the nature scope and ambition of different ideologies

in everyday usage ideology tends to be a pejorative term synonymous with the dogmatic or fanatical this is not the sense in which the term is used in this book nor does this book adopt the instrumental approach to ideology common among social scientists and marxists which sees ideology as socially determined rather than as a body of relatively coherent and comprehensive beliefs of interest in their own right it is this last feature of ideologies which this book focuses on namely ideologies key assumptions and themes their intrinsic content this is not to deny that there are interesting questions to be asked about the social origins and role of ideologies however these questions would require a separate book to do them justice moreover we live in an age of hyper change suddenly in the last decade or so the ideologies which were in the ascendant in the early twentieth century seem to have entered terminal decline whilst other ideologies have been rejuvenated and newer ones have grown in force in general these changes have undermined the left more than the right though the rise of new ideologies throughout the twentieth century has helped show the weaknesses classifying ideologies by the traditional left right spectrum
