this book showcases cutting edge research papers from the 6th international conference on research into design icord 2017 the largest in india in this area written by eminent researchers from across the world on design process technologies methods and tools and their impact on innovation for supporting design for communities while design traditionally focused on the development of products for the individual the emerging consensus on working towards a more sustainable world demands greater attention to designing for and with communities so as to promote their sustenance and harmony within each community and across communities the special features of the book are the insights into the product and system innovation process and the host of methods and tools from all major areas of design research for the enhancement of the innovation process the main benefit of the book for researchers in various areas of design and innovation are access to the latest quality research inthis area with the largest collection of research from india for practitioners and educators it is exposure to an empirically validated suite of theories models methods and tools that can be taught and practiced for design led innovation the contents of this volume will be of use to researchers and professionals working in the areas on industrial design manufacturing consumer goods and industrial management

this book gives managers an integrative approach to project program and change management it describes the differences between change in projects versus programs with case studies in both areas and the different life cycles while the project and change comprise much of the book it is up to date with its emphasis on agile scrum and benefits the book also describes methods to both initiate and manage a change and what must be done for success and business value

developing software systems which are easy to use while simultaneously increasing the productivity performance and satisfaction of users is still a major challenge in software engineering thus a large number of usability engineering

methods have been proposed to systematically develop software with high usability a large number of studies indicate that even basic usability engineering methods are not integrated in software development lifecycles practiced in industrial settings yet problems in the adoption of methods by project teams are rarely examined this book provides a new perspective on the integration and adoption of usability engineering methods by software development teams the adoption of methods by project teams contrary to popular belief is not assured just because it is mandated by the organization this work argues that usability engineering methods can only be regarded as integrated in the software development process of an organization when these methods are practiced and accepted by development teams so far no frameworks for examining the acceptance of methods by project teams and for exploiting such data for guiding project teams in method deployment are available to address this problem this book presents an approach which consists of a process meta model for guiding project teams in the deployment of usability en neering methods and a measurement framework for measuring the acceptance of the deployed methods the approach is called adoption centric usability engineering

here are the refereed proceedings of the 6th international and interdisciplinary conference on modeling and using context the 42 papers deal with the interdisciplinary topic of modeling and using context from various perspectives including computer science artificial intelligence cognitive science linguistics organizational science philosophy and psychology in addition readers discover applications in areas such as medicine and law

this volume of the animas la plata series swca anthropological research paper no 10 presents flaked stone and ground stone assemblage data and analysis methods and results patterning in archaic basketmaker ii and pueblo i assemblages through time and across space are addressed and regional comparisons are made

covers theoretical psychometric and practical issues related to the assessment of competencies in educational and vocational settings this book is suitable for researchers interested in theoretical and psychometric background of assessment and for readers interested in practical aspects of computer based assessment and evaluation
