this major macroeconomics text by robert barro and vittorio grilli is written from a european perspective it adopts an open economy approach and incorporates full treatment of european labour and financial institutions and markets and covers the main macroeconomic theories and policy in relation to the components of the macroeconomic environment

this paper discusses the common agricultural policy of the european union from a macroeconomic perspective this approach is based on recent empirical evidence from various sources indicating that the cost of present agricultural protection in europe to consumers and taxpayers in terms of welfare lost and of output foregone is higher than has been commonly understood this conclusion is supported by assessing the cost of farm protection by simple general equilibrium analysis that reflects the implicit discrimination involved against manufacturing trade and services in europe whereas short run partial equilibrium studies have generally indicated deadweight losses due to farm support equivalent to about 1 percent of gdp on average long run general equilibrium considerations are shown to raise the loss estimates to about 3 percent of gdp by lowering costs and prices freer farm trade could deliver a substantial long run supply side boost to the european economy and to the world economy as a whole facilitating a noninflationary decrease in interest rates and unemployment in western europe and possibly also paving the way for export led growth in central and eastern europe in the years ahead even so there may remain a cultural justification for continued public support for agriculture in europe if so such support needs to be made more effective and more efficient than it is now

macroeconomics in context a european perspective lays out the principles of macroeconomics in a manner that is thorough up to date and relevant to students with a clear presentation of economic theory throughout this latest addition to the bestselling in context set of textbooks is written with a specific focus on european data institutions and historical events offering engaging treatment of high interest topics including sustainability brexit the euro crisis and rising inequality policy issues are presented in context historical institutional social political

and ethical and always with reference to human well being this book is divided into four parts covering the following key issues the context of economic analysis including basic macroeconomic statistics and tools the basics of macroeconomic measurements including gdp inflation and unemployment as well as alternative measures of well being and the particular structures of the european economies methods for analyzing monetary and fiscal policy including an in depth coverage of the instruments and approaches of the european central bank and some coverage of an open economy the application of the tools learnt to selected macroeconomic issues such as the euro crisis the global financial crisis public debt global development and environmental sustainability far more than any other existing macroeconomic textbook this book combines real world relevance of the topics covered with a strong focus on european institutions and structures within an approach that explains multiple economic paradigms this combination helps to raise students interest in macroeconomics as well as enhance their understanding of the power and limitation of macroeconomic analysis visit bu.edu/eci/education/materials/textbooks/macroeconomics_in_context_a_european_perspective/ for online resources for both lecturers and students a video of a panel discussion about the book can be found at youtu.be/xjhjrw9wp44

the financial crisis of 2007 required the economics discipline to thoroughly re evaluate its prevailing theories about economic cycles and economic growth with a focus on europe this volume identifies the latest strands of research on business cycles monetary theory the evolution of social policies and public spending and the institutional context of the european union it also considers whether these new ideas could have helped us avoid the crisis and how they might reshape the current economic paradigm this book will be of interest to advanced students and researchers in european economics macroeconomics and economic history

considers the way in which the european union has affected autonomy in macroeconomic policy making of the member states it begins with an introduction to economic ideas and explores current themes surrounding monetary and fiscal policy and european integration including economic policy co ordination objectives in national policy making and moti

this book provides a new methodological approach to money and macroeconomics realizing that the abstract equilibrium models lacked descriptions of fundamental issues of a modern monetary economy the focus of this book lies on the stylized balance sheets of the main actors money after all is born on the balance sheets of the central bank or commercial bank while households and firms hold accounts at banks with deposits banks hold an account at the central bank where deposits are called reserves the book aims to explain how the two monetary circuits central bank deposits and bank deposits are intertwined it is also shown how government spending injects money into the economy modern monetary theory and european macroeconomics covers both the general case and then the eurozone specifically a very simple macroeconomic model follows which explains the major accounting identities of macroeconomics using this new methodology the eurozone crisis is examined from a fresh perspective it turns out that not government debt but the stagnation of private sector debt was the major economic problem and that cuts in government spending worsened the economic situation the concluding chapters discuss what a solution to the current problems of the eurozone must look like with scenarios that examine a future with and without a euro this book provides a detailed balance sheet view of monetary and fiscal operations with a focus on the eurozone economy students policy makers and financial market actors will learn to assess the institutional processes that underpin a modern monetary economy in times of boom and in times of bust

recoge 1 the tools of macroeconomics 2 the issues of european integration

this comprehensive and far reaching book describes the growth and economic integration of the european economy from 1500 to 1913 the authors apply macroeconomic techniques to

identify growth rates inflation product markets trade networks and business cycles across a set of countries over the period the book demonstrates that growth was the natural state for european economies throughout the period although under the impetus of the industrial revolution growth rates generally accelerated by the end of the nineteenth century similarly business cycles in the modern sense seem to have been in evidence at the beginning of the period but by the eighteenth century there is no doubt that modern cycles affected these countries sometimes simultaneously inflationary episodes are both distinct and shared in this long period with the long inflation of the sixteenth century attesting to the integration of european markets finally the authors find abundant quantitative evidence to support the argument that economies linked by international trade in 1500 came close to achieving global integration by 1913 the european macroeconomy will be of interest to scholars of economic history international economics and macroeconomics

restoring europe's prosperity is the first annual produced by the centre for european policy studies ceps an independent research institution which focuses on the major medium and long term issues facing the european community and western europe both internally and internationally the most important economic problems of the past five years have concerned unemployment economic growth fiscal deficits and the value of the u s dollar it is clear that past and present economic policies have not effectively addressed these problems this ceps annual selects the best work of the centre's macroeconomic policy group a rotating group of distinguished economists who are studying macroeconomic conditions and trends the implications of the economic policies being pursued and possible alternative policies the essays and their authors are macroeconomic prospects and policies for the european community by r dornbusch g basevi o blanchard w buiter and r layard europe the case for unsustainable growth by r layard g basevi o blanchard w buiter and r dornbusch employment and growth in europe a two handed approach by o blanchard r dornbusch j dreze h giersch r layard and m monti public debt and fiscal responsibility by o blanchard r dornbusch and w buiter us deficits the dollar and europe by o blanchard and r dornbusch olivier blanchard is professor of economics at mit rudiger dornbusch ford international professor of economics is also at mit richard layard professor of economics is head of the centre for labour economics at the london school of economics

this book is a critical review of current fiscal and monetary policy in europe and presents results of both empirical research and a discussion of the theoretical framework behind the policy of the ecb and the stability and growth pact

a new examination of macroeconomics that deals with topics relating to economic growth unemployment and inflation with particular emphasis on contemporary irish and european economic issues

this book conveys the excitement of macroeconomics covering many of the main macroeconomic issues of the day issues often missing from other texts its example rich approach provides a strong emphasis on the role of expectations the openness of modern economics and the role of dynamics

during the recession in the years 2008 2009 the most severe for mature economies in the post war period housing markets were often mentioned as having a special responsibility the objective of this book is to shed light on the cyclical behaviour of the housing markets its fundamental determinants in terms of supply and demand characteristics and its relationship with the overall business cycle the co movements of house prices across countries are also considered as well as the channel of transmission of house price changes to the rest of the economy particular attention is paid to the effects on private consumption through possible wealth effects the book is a compilation of original papers produced by economists and researchers from the four main national central banks in the euro area also with the

participation of leading academics

blanchard who is the economic counselor and director of research at the international monetary fund imf presents a unified and global view of macroeconomics enabling students to see the connections between the short run medium run and long run technological problems and growth financial markets and expectations the goods market in an open economy monetary policy and fiscal policy for business professionals seeking to understand the macroeconomic picture of corporate businesses
