first multi year cumulation covers six years 1965 70

the unique characteristics of the most popular certification programs offered today microsoft novell oracle comptia and sun java are detailed in this edition including information on price test lengths testing locations study materials and the types of questions on the exams

internationally renowned basic and clinical scientists provide an account of our best current understanding of the genetics of cancer these authoritative contributors describe in detail each of the known molecular mechanisms governing neoplastic transformation in the breast prostate lung liver colon and skin and in the leukemias and lymphomas their discussion illuminates both recent developments and established concepts in epidemiology molecular techniques oncogenesis and mutation mechanisms as well as the chemical viral and physical mechanisms in cancer induction

in the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients this is a useful book that deserves to do well i hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field  
nejm book review

in 74 chapters gastrointestinal oncology brings together a diverse group of specialists to provide the most authoritative up to date and encyclopedic volume currently available on the subject the first part of this text introduces a series of concepts and topics taht are important to gastrointestinal malignancies in general these topics include epidemiologic principles prevention screening familial gi cancers developmental and molecular biology pathobiology general therapeutic principles emerging therapies and palliative care the second part of the book covers each of the specific cancers affecting the human gastrointestinal tract these chapters are introduced by state of the art discussions outlining our current understanding of the pathobiology and molecular biology relevant to each cancer subsequent sections describe the multidisciplinary management of specific clinical situations by organizing the treatment related chapters around clinical scenarios
