in this provocative essay finished just before the author's death Gellner explores the subject with which he was most associated throughout his life that of nationalism he demonstrates how the histories of nationalism and industrialization are crucially linked and drawing together the history of philosophy economics and political thought he contrasts nationalism with religious fundamentalism in a debate that remains of continuing importance to modern politics and international relations

Ernest Gellner a Jew who escaped from Czechoslovakia in 1939 after Hitler invaded knew first hand the catastrophic effects of excessive nationalism and he was determined to understand the phenomenon that had shaped so much of 20th century history

Nationalism has become a key area of political theory over recent years with a huge expansion in the amount of literature available yet there are very few readers which bring together the best and most representative of these works in one volume this reader includes both the core texts in the area which are required for any course on nationalism and a selection of more interesting less mainstream pieces for example from post communism and feminism and debates which have taken place over issues such as citizenship migration and asylum with the aim of engaging the reader with some of the contemporary debates which have reconfigured our understanding of nationalism the overall aim of the reader is to allow students to draw together and relate theories and debates within and across a range of disciplines illuminating themes and issues of central importance in both historical and contemporary contexts and showing how nationalism has evolved and has impacted upon and interacted with other political and social forms and forces following a substantial introduction which provides the historical background the reader is divided into six sections 1 the origins of nationalism 2 approaches to nationalism 3 differentiating nationalism e nationalism racism ethnicity 4 forms of nationalism 5 national self determination and nationalist mobilisation 6 globalisation citizenship and

nationalism key features e offers a mix of traditional texts from classic writers such as gellner smith anderson and breuilly and more innovative readings from fields such as post communism and feminism covers topical debates surrounding citizenship self determination and migration the introduction provides the necessary historical background for understanding recent debates and places the contributions in their immediate context clear guidance for further reading is given at the end of each section

the forecast demise of nationalism under the new moral orders of communism and internationalism has proved illusory in the present century to an extent greater perhaps than in all others nationalism has been the dominant force in the affairs of humankind why should this have been why is it that a national identity should continue to be the aspiration of almost all peoples without one and at the same time the justification in the process of obtaining securing and expanding it for casting aside every trace and tradition of civility in encounters with nationalism ernest gellner seeks some answers his approach is to consider first the ideas of the main modern thinkers on the subject from marx list malinowski and carr to masaryk heidegger patocka hroch havel and said he examines the origins subjects and context of their writings their interactions with culture and politics and their influence both on theory and on events the range is wide covering eastern western and islamic societies and includes extensive discussions of the related themes of civil society theocracy communism imperialism capitalism and liberalism professor gellner is never less than trenchant he is concerned here not only to understand but to criticize he confronts several powerful and fashionable notions that fuel and or attempt to explain contemporary nationalism among them postcolonialism on the one hand he exposes their incoherence and irresponsibility on the other he places them alongside ideas of real currency nor does he evade the controversy surrounding the nature of judgement itself the reader will also find here concise and penetrating discussions of relativism pluralism objectivity and the possibility of universal values

ernest gellner a jew who escaped from czechoslovakia in 1939 after hitler invaded knew first hand the catastrophic effects of excessive nationalism and he was determined to understand the phenomenon that had shaped so much of 20th century history

the twenty first century is witnessing a truly transnational revival of a very old set of ideas despite romantic attachments to old symbols these late modern nationalism movements are not simply replicas of the previous two waves of nationalism in the 1860s and 1920s nor is it true that today s nationalism movements want simply to return to the past and effect a nationalist 1930s style retrenchment from putin s macho revivalism through to trump s shocking victory and xi s strongman regionalism nationalists engage with the economic context of our time and address issues born of globalization crucially in their vision for international relations they seek the destruction of key international norms in a drive to restore a vision of sovereignty predicated on a survivalist understanding of state power global nationalism edited and framed by pablo de orellana and nicholas michelsen brings together the latest research by up and coming early career researchers and scholars beginning with a succinct history and typology of contemporary nationalism and its predecessors this book offers analysis of several cases of contemporary nationalism examining how specific movements define identity address grievances and propose identity based solutions key themes and lessons emerge from the study of a variety of cases from the very ideas animating nationalist thought to their expression in a wide variety of nationalist movements around the world the reflections on the ecosystem of nationalist ideas and movements offered in this volume are a vital starting point in the study of contemporary nationalism as a global twenty first century phenomenon

ernest gellner was a multilingual polymath who set the agenda in the study of nationalism and the sociology of islam for an entire generation of academics and students this definitive biography follows his trajectory from his early years in prague paris and england to international success as a philosopher and public intellectual known both for his highly integrated philosophy of modernity and for combining a respect for nationalism with an appreciation for science gellner was passionate in his

defence of reason against every form of relativism

this book looks at the fundamental components of national identity as understood by ordinary nation members and the way in which it is mobilised by political elites drawing on an original case comparison between wales and the basque country the author suggests there are many commonalities between these two nations particularly around the fundamentals of their national identities however differences occur in terms of degree of intensity of feeling and around the politicisation of identity with more entrenched and hostile political positioning in the basque country than wales through a multi level comparison the book generates insights into national identity as a theoretical concept and in a stateless nation context it argues for national identity's intangible yet polemical nature looking at the primordialist way it is understood its permanence and importance coupled with its lack of everyday salience and consequent obligations

in geography of hope french sociologist and historian pierre birnbaum examines the work of some of the prominent jewish social scientists of the past two centuries in order to analyze their range of responses to the tensions between the enlightenment call for universalism and the reality of jewish particularism

this volume may be of interest for all those who wish that philosophy had a scientific character as an adherent of the polish lvov warsaw philosophical school the author of this collection of papers endeavours to clarify some basic notions of epistemology ontology and psychology of cognitive acts such as judgment existence being etc in his investigations he refrains from unnecessary rejection of common sense knowledge but at the same time searches for suitable patterns in contemporary sciences regarding formal logic as a fundamental tool for the precise expression and justification of thoughts the author tries to clear logic from ontological commitments shows how to construct logic of norms and how to use safely different definitions in research works the book presents a new conception of antinomies and an innovative approach to realistic epistemology moreover some applications of logical methods are illustrated by examples of semantical analyses of the general notion of similarity and the biological concept of homology

an exposition of gellner's thought both in terms of the specific areas in which he worked and the underlying consistency of his theoretical principles it provides a context within which to evaluate gellner's contribution to social and political thought
