natural hazards earth processes as hazards disasters and catastrophes fourth edition is an introductory level survey intended for university and college courses that are concerned with earth processes that have direct and often

sudden and violent impacts on human society the text integrates principles of geology hydrology meteorology climatology oceanography soil science ecology and solar system astronomy the book is designed for a course in natural hazards for non science majors and a primary goal of the text is to assist instructors in guiding students who may have little background in science to understand physical earth processes as natural hazards and their consequences to society natural hazards uses historical to recent examples of hazards and disasters to explore how and why they happen and what we can do to limit their effects the text s up to date coverage of recent disasters brings a fresh perspective to the material the fourth edition continues our new active learning approach that includes reinforcement of learning objective with a fully updated visual program and pedagogical tools that highlight fundamental concepts of the text this program will provide an interactive and engaging learning experience for your students here s how provide a balanced approach to the study of natural hazards focus on the basic earth science of hazards as well as roles of human processes and effects on our planet in a broader more balanced approach to the study of natural hazards enhance understanding and comprehension of natural hazards newly revised stories and case studies give students a behind the scenes glimpse into how hazards are evaluated from a scientific and human perspective the stories of real people who survive natural hazards and the lives and research of professionals who have contributed significantly to the research of hazardous events strong pedagogical tools reinforce the text s core features chapter structure and design organizes the material into three major sections to help students learn digest and review learning objectives

these fact filled titles offer detailed information about how our planet has changed through time various geological hydrological chemical and meteorological processes within each book are explained including the causes behind them and their consequences specific topics include plate tectonics rocks and how they determine topography and weather on a global scale

a book designed for readers interested in the environment this is an excellent source for earth science information about hazardous earth processes which affect virtually everyone living on this planet book includes hazard city cd rom for exersices that put students in the role of a practicing geologist interesting and well written this book includes broad coverage of many natural hazards including earthquakes volcanoes flooding landslides coastal erosion extreme weather and wildfires for those interested in a comprehensive book about our environment and the impact of natural hazardous processes also useful as a reference work for science writers and editors

offering a straightforward non technical presentation this work is intended for students with little or no college level science experience environmental problems are discussed within appropriate sections of the text

today climate related processes and problems are referred to as global change by nearly everyone including scientists politicians and economists citizens worldwide are anxious about the often observed disorientation of our environment under the influence of man better information on the earth's natural systems and their possible alterations is necessary the topic itself is so wide that sound scientific descriptions of it as a whole are rare for the non specialist information from relevant fields is not easy to obtain and often the prognostic models presented are contradictory and even for specialists difficult to evaluate therefore this book on climate earth processes and earth history by richard huggett fills an important gap it discusses the great climate related areas of the earth's environment the atmosphere the hydrosphere the sediments as products of weathering and geomorphic processes the relief as landforms and soils and the biosphere are thoroughly treated as the prominent sub systems which are greatly affected by climate these subsystems not only control the visual and internal aspects of our landscapes but they are themselves especially influenced by climatic changes which can be due to either changes in the natural system or anthropogenic changes thus our landscapes will be subject to significant alterations if climatic variations exceed certain thresholds the plan for the present book by richard huggett was originally discussed in regard to the springer series on physical environment

natural hazards uses real life examples of hazards and disasters to explore how and why they happen and what we can do to limit their effects the text's up to date coverage of recent disasters brings a fresh perspective to the material the third edition provides a new active learning approach a fully updated visual program and revised pedagogy tools that highlight hallmark concepts of the text students have access to an updated hazard city an online media resource which gives instructors meaningful easy to assign and easy to grade assignments in which students investigate virtual disasters in the fictional town of hazard city this program will provide an interactive and engaging learning experience for your students here's how provide a balanced approach to the study of natural hazards focus on globalization of our economy information access and human effects on our planet in a broader more balanced approach to the study of natural hazards engage your students with hazard city students work through 11 different assignments by stepping into the role of a practicing geologist and analyzing potential disasters in the fictional town of hazard city enhance understanding and comprehension of natural hazards newly revised stories and case studies give students a behind the scenes glimpse into the lives of survivors professionals and hazardous events strong

pedagogy tools reinforce the text's core features the new chapter structure and design organizes the material into three major sections to help students learn digest and review learning objectives
