as the pacific war approached a crescendo the clashes between swarming us navy carrier aircraft and the gigantic imperial japanese navy ijin yamato class battleships became symbolic of the fortunes of the two nations they also served as a metaphor for the profound changes in naval technology and doctrine that the war had brought about the two opposing forces were the most powerful of their kind the japanese yamato and musashi were the biggest most heavily armored and armed battleships ever built while us carrier aviation had evolved into a well oiled war winning machine with detailed analysis of the technical features of the opposing war machines and a gripping account of the fighting itself this vividly illustrated work presents views from the cockpits of us navy divebombers and down the sights of ijin anti aircraft guns during two of the most dramatic naval engagements ever fought

this work is a comprehensive heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the united states it is divided into three chronological sections the early era 1912 1928 the golden era 1928 1945 and the post war era 1945 present with historical overviews of each period within each section individual aircraft types are listed in alphabetical order by manufacturer or builder with historical background technical specifications drawings and one or more photographs appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage

with the outbreak of world war ii britain s royal navy and her fleet of battleships would be at the forefront of her defence yet ten of the 12

battleships were already over 20 years old having served in world war i and required extensive modifications to allow them to perform a vital service throughout the six long years of conflict angus konstam offers a comprehensive review of the development of these british battleships from their initial commissioning to their peacetime modifications and wartime service with detailed descriptions of the effectiveness of the main armament of individual ships with specially commissioned artwork and a dramatic re telling of key battleship conflicts this book will highlight what it was like on board for the sailors who risked their lives on the high seas

the noted historian offers a compelling sociohistorical account of an often overlooked yet critical wwii explosive twice as powerful as tnt choice during the early years of world war ii american ships crossing the atlantic were virtually defenseless against german u boats bombs and torpedoes fitted with tnt barely dented the hulls of axis naval vessels then seemingly overnight a top secret manufacturing plant appeared near kingsport tennessee producing a sugar white substance called research department explosive code name rdx twice as deadly as tnt and overshadowed only by the atomic bomb rdx proved to be pivotal in the battle of the atlantic and directly contributed to the allied victory in wwii in the secret history of rdx colin f baxter documents the journey of the super explosive from conceptualization at woolwich arsenal in england to mass production at holston ordnance works in east tennessee baxter examines the debates between rdx advocates and their opponents and explores the use of the explosive in the bomber war over germany in the naval war in the atlantic and as a key element in the trigger device of the atomic bomb drawing on archival records and interviews with individuals who worked at the kingsport powder plant baxter illuminates both the explosive s military significance and its impact on the lives of ordinary americans involved in the war industry much more than a technical account this study assesses the social and economic impact of the military industrial complex on small communities on the home front
