study guide to forensic psychiatry is a question and answer companion that allows you to evaluate your mastery of the subject matter as you progress through the American Psychiatric Publishing textbook of forensic psychiatry. The study guide is made up of 115 questions divided into 23 individual quizzes of 5-10 questions each that correspond to chapters in the textbook. Questions are followed by an answer guide that references relevant text including the page number in the textbook to allow quick access to needed information. Each answer is accompanied by a discussion that not only addresses the correct response but also explains why other responses are not correct. The study guide is a companion to the American Psychiatric Publishing textbook of forensic psychiatry, the first reference designed and written for both the general clinician and the experienced forensic psychiatrist. Twenty-eight recognized experts introduce the forensic subjects that commonly arise in clinical practice. Each chapter is organized around case examples and includes a review of key concepts, practical guidelines, and references for further reading. This practical textbook makes this interesting specialty accessible to trainees and seasoned practitioners.

The PSA-R examination consists of 125 questions. These questions are based on material from many sources including DSM-IV, the APA practice guidelines, and journal articles that have made significant contributions to the practice of psychiatry during the last decade. The complete program includes an examination booklet with answer sheet, a syllabus in print and CD-ROM formats, a personal score report with accompanying critique and reference book, and performance interpretation guidelines. Please note: residents receive the syllabus on CD-ROM only; no print syllabus; and members/nonmembers receive the syllabus in print and on CD-ROM.

A review of modern psychiatric theory and practice. Readers test their knowledge against challenging questions paired with detailed rationales for the correct response. Questions follow the organization of content found in Tasman, Kay, and Lieberman, *Psychiatry: The Text Delivering Basic Science, Theory, and Clinical Guidance*. Each question is page-referenced to the corresponding section in the main text.
