This paper compares standards of living between Canadian provinces and US states using gross domestic product (GDP) per capita as a measure. It first discusses the framework of the analysis and the empirical issues involved, then presents results for provinces, states and regions with regard to the standard of living and productivity. Appendices include discussion of the comparability of Canadian and US GDP measures.

The study examines the extent and nature of changes in the Canadian industrial structure by addressing four policy related questions: what has been the extent of structural change in the Canadian economy; has the pace of structural change been accelerating; is the Canadian economy becoming more innovative; is it increasing its use of knowledge, technology, skills, etc.; and what are the key factors driving this structural change? Final domestic demand, exports, imports or technical change measured by changes in input output coefficients.
