discourse about the relationship between seasons and human mood has a substantial history in medicine the arts and the social sciences over the last decade this perennial topic has been dominated by the construct of seasonal affective disorder sad sad is a psychiatric syndrome characterised by depressions which recur at the same time each year typically winter rosenthal et al 1984b sad is typically understood as the extreme end of a continuum of normative seasonal variation in mood and behaviour seasonality the research reported here had four interrelated aims the first aim was to test for the existence of seasonality in human mood as defined by sad it can be argued that this topic is both important and potentially fruitful seasonality is critical for the validation of sad itself it has been proposed that the most important unresolved issue of sad research is the definition of seasonality furthermore seasonality is a scientifically interesting

construct because it implies a unique trait of mood variability in the context of environmental changes as such the investigation of seasonality provides a test of current understandings of the relationship between personality mood and affective vulnerability the second aim of the research therefore was to situate seasonality in the nomological web of trait constructs the third aim was to test a novel hypothesis about the psychobiology of the trait of neuroticism a hypothesis that derived from the integration of seasonality into the nomological net of personality constructs the key dependent variable in the research was mood and therefore a fourth aim was to investigate a contemporary model of mood by testing the hypothesis that a positive affect system is partially driven by biological rhythms

authors sandra mcintire and leslie miller have accomplished what few before them have been able to they have written a psychological testing book that is designed to lay a true foundation for learning and understanding the primary objective of this text is not to dwell on the details of individual psychological tests but to focus on the core concepts psychometrics required to gain an appreciation of how to use the tests properly written in response to a growing need for a textbook on psychological testing conducive to maximal student learning an introduction psychological testing gives students an understanding of the basic concepts issues and tools used in psychological testing it then effectively illustrates how these concepts issues and tools are relevant to them in everyday educational clinical and organizational settings

in 1887 in a san francisco populated by dogs retired veterinarian dr edward r smithfield and his friend mr samuel blackthorne attempt to solve the mysterious disappearance of an unassuming accountant

the now popular idea that emotions have an intelligent core and the reverse that intelligence has an emotional core comes from the neurosciences and psychology similarly the fundamental sexualization of the brain the new interest in essential differences in male and female brains and behaviors is based on neuroscience research and neuroimages of emotions in sexualized brains scholars from a range of disciplines reflect on the epistemological claims that emotional intelligence ei can be located in the brain and that it is legitimate to attribute distinct kinds of emotions to the biological sexes the brain as an icon has colonized the humanities and social sciences leading to the emergence of such new disciplines as neurosociology neuroeconomics and neurophilosophy neuroscience and psychology now have the power to transform not only the practice of science but also contemporary society these developments the essays in this volume show will soon affect the very heart of gender studies

the current project specified ten objectives or goals that would be addressed through the initial analysis of the event database this report addresses the first 9 of these goals which include analyses of rear end events lane change events the role of inattention and the relationship between levels of severity goal 10 is a separate report and addresses the implications for a larger scale data collection effort

each winter the iowa department of transportation iowa dot maintenance operators are primarily responsible for plowing snow off federal and state roads drivers typically work long shifts under treacherous conditions in addition to properly navigating the vehicle drivers are required to

operate several plowing mechanisms simultaneously such as plow controls and salt sprayers however operators have few opportunities during the year to practice and refine their skills an ideal training program would provide operators with the opportunity to practice these skills under realistic yet safe conditions as well as provide basic training to novice or less experienced operators recent technological advancements have made driving simulators a desirable training and research tool this literature review discusses much of the recent research establishing simulator fidelity and espousing its applicability additionally this report provides a summary of behavioral and eye tracking research involving driving simulators other research topics include comparisons between novice and expert drivers behavioral patterns methods for avoiding cybersickness in virtual environments and a synopsis of current personality measures with respect to job performance and driving performance this literature review coincides with a study designed to examine the effectiveness of virtual reality snowplow simulator training for current maintenance operators using the transim vs iii truck and snowplow simulator recently purchased by the iowa dot
