authors sandra mcintire and leslie miller have accomplished what few before them have been able to they have written a psychological testing book that is designed to lay a true foundation for learning and understanding the primary objective of this text is not to dwell on the details of individual psychological tests but to focus on the core concepts psychometrics required to gain an appreciation of how to use the tests properly written in response to a growing need for a textbook on psychological testing conducive to maximal student learning an introduction psychological testing gives students an understanding of the basic concepts issues and tools used in psychological testing it then effectively illustrates how these concepts issues and tools are relevant to them in everyday educational clinical and organizational settings

discourse about the relationship between seasons and human mood has a substantial history in medicine the arts and the social sciences over the last decade this perennial topic has been dominated by the construct of seasonal affective disorder sad sad is a psychiatric syndrome characterised by depressions which recur at the same time each year typically winter rosenthal et al

1984b sad is typically understood as the extreme end of a continuum of normative seasonal variation in mood and behaviour seasonality the research reported here had four interrelated aims the first aim was to test for the existence of seasonality in human mood as defined by sad it can be argued that this topic is both important and potentially fruitful seasonality is critical for the validation of sad itself it has been proposed that the most important unresolved issue of sad research is the definition of seasonality furthermore seasonality is a scientifically interesting construct because it implies a unique trait of mood variability in the context of environmental changes as such the investigation of seasonality provides a test of current understandings of the relationship between personality mood and affective vulnerability the second aim of the research therefore was to situate seasonality in the nomological web of trait constructs the third aim was to test a novel hypothesis about the psychobiology of the trait of neuroticism a hypothesis that derived from the integration of seasonality into the nomological net of personality constructs the key dependent variable in the research was mood and therefore a fourth aim was to investigate a contemporary model of mood by testing the hypothesis that a positive affect system is partially driven by biological rhythms

the current project specified ten objectives or goals that would be addressed through the initial analysis of the event database this report addresses the first 9 of these goals which include analyses of rear end events lane change events the role of inattention and the relationship between levels of severity goal 10 is a separate report and addresses the implications for a larger scale data collection effort

in 1887 in a san francisco populated by dogs retired veterinarian dr edward r smithfield and his friend mr samuel blackthorne attempt to solve the mysterious disappearance of an unassuming accountant

the now popular idea that emotions have an intelligent core and the reverse that intelligence has an emotional core comes from the neurosciences and psychology similarly the fundamental sexualization of the brain the new interest in essential differences in male and female brains and behaviors is based on neuroscience research and neuroimages of emotions in sexualized brains scholars from a range of disciplines reflect on the epistemological claims that emotional intelligence ei can be located in the brain and that it is legitimate to attribute distinct kinds of emotions to the biological sexes the brain as an icon has colonized the humanities and social sciences leading to the emergence of such new disciplines as neurosociology neuroeconomics and neurophilosophy neuroscience and psychology now have the power to transform not only the practice of science but also contemporary society these developments the essays in this volume show will soon affect the very heart of gender studies

the text provides a uniquely comprehensive overview of the wide range of questionnaires inventories and adjective scales available for assessing personality as described by the big five model and related concepts the book includes chapters on all major instruments such as the fffi bfq neo pi r hpi hipic zkpq ipip ff npq gpi tpque iasr b5 bfms siffm jal sfpq acl 16pf ppq and mmpi 2 psy 5 each chapter is written either by test authors themselves or by other renowned experts and the book thus provides the best possible guidance on the distinctive features use analysis interpretation and limitations of big five and related instruments a comprehensive overview of personality assessment instruments based on the big five model of personality and related constructs a useful resource for those involved in personality assessment and research

the aim of this textbook is to help students understand the construction and use of tests in psychological educational and employment settings the goal is to make psychological testing and assessment an interesting and important field of study this revision not only updates information throughout the text but also strengthens the coverage of several key issues such as the methodological aspects of testing and the research on and theories of intelligence also greater emphasis has been placed on applications of psychological testing in education clinical and industrial organizational settings
