1. Anchoring

Anchoring is a technique that involves associating a specific stimulus with a particular emotional state. Once established, triggering the stimulus can bring back the desired emotional response.

- Recall a vivid memory linked to that state
- Apply a unique stimulus (like touch or word) during the peak of that emotion
- Use the stimulus

later to access the same emotional state 2. Swish Pattern This technique helps in replacing undesirable behaviors or thought patterns with positive ones. Identify the unwanted behavior or thought1. Create a vivid mental image of the unwanted pattern2. Develop a compelling image of the desired behavior or thought3. Swish the images in your mind—making the positive image larger and more4. prominent Repeat until the new pattern becomes automatic5. 3. Meta Model The Meta Model is a questioning technique that helps clarify vague language and uncover limiting beliefs, enabling better understanding and problem-solving. Ask specific questions to identify assumptions and distortions in communication Challenge limiting beliefs Reframe negative statements into empowering ones 4. Milton Model Based on Milton Erickson's hypnotic language patterns, this technique is used for indirect influence and suggestion. Use vague, permissive language to guide the listener Embed suggestions within normal conversation Facilitate subconscious change without resistance 5.
