in the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development urban scholars have come to recognize that cities are shaped by forces beyond their boundaries from that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed but what else needs to be said about the policies and politics of urban development to supplement prevailing theories the politics of urban development argues that the role of local actors in making development decisions merits closer study whatever the structural constraints politics still matters collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population the impact of the collection is to heighten awareness of local political practices and of how and why they make a difference

the proper task of the social sciences this book argues is to understand and control the impact of social and political institutions on human life not to predict and control human behavior such a reorientation must start in the author s view with a rejection of the assumptions of traditional western political thought whether or not a reader can agree in full with the argument here he is sure to find it a stimulating challenge to his own presuppositions chief among the assumptions of western political thought is the inevitability of hierarchy which in turn assumes the inevitability of widespread social ignorance the latter assumption flows from a view of the human species as wanting in motivation character and intelligence these assumptions according to dr spence have attained the power of myth in the sense that no facts known or imaginable would be permitted to falsify them or even seriously to modify them thus a work loving responsible intelligent person is regarded as an exception to human nature produced by hierarchical institutions and a group of cooperating procedures without structured positions of domination is treated as a case of hidden hierarchy humankind never ceases its struggle for autonomy but is thwarted by social ignorance from plato s allegory of the cave to the latest research in political socialization compound the ignorance because such explanations force the investigator to assert his intellectual and political superiority the weight of evidence from modern psychology is that learned is a self activated seeking process rather than a passive reception and recording of data that being so kuhn s theory of scientific development wrongly emphasizes dogmatism with individual creativity as the exception the emphasis should be reversed moreover trigant burrow was right as are bateson and laing in challenging freud s view that so called normal behavior constitutes mental health social scientists should teach citizens to free themselves from social deception no matter how pervasive and accepted respect for

our intellectual heritage as the author writes in his preface demands more than the study of the so called masters it requires our willingness to philosophize and to create theories just as they did
