globalization and global equity are built on the premise of peace. the causes of many divisions and tensions in human communities lie in the imagined or real gain of financial or material assets of some elements of the community to be at the expense of others. the global community however lacks clear definitions and methods of stability whether political, economic or social. digital bridges developing countries in the knowledge economy provides insight into the methods and theories behind the globalization of information technologies

this book revolves around three closely related questions. first, how did George W. Bush, a wisecracking, cutup, mediocre student, failed oil patch entrepreneur and fighter pilot in the Texas Air National Guard's champagne unit, become a war president? did George W. Bush go too far invading Iraq, abandoning the Geneva Conventions' safeguards for captured prisoners and conducting surveillance over American citizens without court approval in wielding his powers as war president? and finally, will George W. Bush receive history's accolade as a great American president for his leadership in the war on terror?

dead or alive features a unique body of work by the artist Mark Fairnington whose recent painterly preoccupations—the pseudo-scientific documentation of hitherto unknown species of South American insects—address issues of verisimilitude, taxonomy, representation and meaning in art. Mark Gisbourne's contribution to the book places Fairnington's work within a postmodern art historical context where art and science, while informing one another, nevertheless remain distinctive disciplines. George McGavin, one of the world's most respected authorities on insect life, has written an account of Fairnington and his experiences in the field in search of new uncategorised species of insect life. 50 colour illustrations.
