arguably the most decisive shift in the history of ideas in modern times was the complete demolition during the late seventeenth and eighteenth centuries in the wake of the scientific revolution of traditional structures of authority scientific thought and belief by the new philosophy and the philosophes culminating in voltaire diderot and rousseau in this revolutionary process which effectively overthrew all justification for monarchy aristocracy and ecclesiastical power as well as man's dominance over woman theological dominance of education and slavery substituting the modern principles of equality democracy and universality the radical enlightenment played a crucially important part despite the present day interest in the revolutions of the late eighteenth century the origins and rise of the radical enlightenment have been astonishingly little studied doubtless largely because of its very wide international sweep and the obvious difficulty of fitting in into the restrictive conventions of national history which until recently tended to dominate all historiography the greatest obstacle to the radical enlightenment finding its proper place in modern historical writing is simply that it was not french british german italian jewish or dutch but all of these at the same time in this novel interpretation of the radical enlightenment down to la mettrie and diderot two of its key exponents particular stress is placed on the pivotal role of spinoza and the widespread underground international philosophical movement known before 1750 as spinozism

the past is what happened history is what we remember and write about that past the narratives we craft to make sense out of our memories and their sources but what does it mean to look at the past and to remember that nothing happened why might we feel as if nothing is the way it was this book transforms these utterly ordinary observations and redefines nothing as something we have known and can remember nothing has been a catch all term for everything that is supposedly uninteresting or is just not there it will take some possibly considerable mental adjustment before we can see nothing as susan a crane does here with a capital n but nothing has actually been happening all along as crane shows in her witty and provocative discussion nothing is nothing less than fascinating when nothing has changed but we think that it should have we might call that injustice when nothing has happened over a long slow period of time we might call that boring justice and boredom have histories so too does being relieved or disappointed when nothing happens for instance when a forecasted end of the world does not occur and millennial movements have to regroup by paying attention to how we understand nothing to be happening in the present what it means to know nothing or to do nothing we can begin to ask how those experiences will be remembered susan a crane moves effortlessly between different modes of seeing nothing drawing on visual analysis and cultural studies to suggest a new way of thinking about history by remembering how nothing happened or how nothing is the way it was or how nothing has changed we can recover histories that were there all along

this work synthesizes work previously published in leading journals in the field into a coherent narrative that has a distinctive focus on germany while also being aware of a broader european dimension it argues that the german lutheran christoph august heumann 1681 1764 marginalized the biographical approach to past philosophy and paved the way for the german lutheran johann jacob brucker s 1696 1770 influential method for the writing of past philosophy centred on depersonalised and abstract systems of philosophy the work offers an authoritative and engaging account of how late ancient platonism plotinus in particular was interpreted in eighteenth century germany according to these new precepts moreover it reveals the lutheran religious assumptions of this new approach to past philosophy which underpinned the works of heumann and brucker but also influential reviews that rejected the english plato translator thomas taylor 1758 1835 and his understanding and evaluation of late ancient platonism
